LaViolette,2004-04-15 Provides compelling evidence that creation myths from the dawn of civilization correspond to cutting edge astronomical discoveries Exposes the contradictions in current cosmological theory and offers a scientific basis for the ancient myths and esoteric lore that encode a theory of continuous creation By the scientist who was the first to disprove the Big Bang theory on the basis of observational data Recent developments in theoretical physics including systems theory and chaos theory are challenging long held mechanistic views of the universe Many thinkers have speculated that the remnants of an ancient science survive today in mythology and esoteric lore but until now the scientific basis for this belief has remained cloaked in mystery Paul LaViolette reveals the remarkable parallels between the cutting edge of scientific thought and creation myths from the dawn of civilization With a scientific sophistication rare among mythologists LaViolette deciphers the forgotten cosmology of ancient lore in a groundbreaking scientific tour de force In direct nontechnical language he shows how these myths encode a theory of cosmology in which matter is continually growing from seeds of order that emerge spontaneously from the surrounding subquantum chaos Exposing the contradictions that bedevil the big bang theory LaViolette offers both the specialist and the general reader a controversial and highly stimulating critique of

prevailing misconceptions about the seldom questioned superiority of modern science over ancient cosmology By restoring and reanimating this ancient scientific worldview Genesis of the Cosmos leads us beyond the restrictive metaphors of modern science and into a new science for the 21st century *Astral Sciences in Mesopotamia* Hermann Hunger, David Pingree, 2015-11-02 Astronomy and astrology or the astral sciences played an enormous if not a key role in the political and religious life of the Ancient Near East and later of the Greek and Roman world This is the first comprehensive and up to date account of the origins of the astral sciences in the Ancient Near East Every type of Sumerian or Akkadian text dealing with descriptive or mathematical astronomy including many individual tablets are thoroughly dealt with All aspects such as the history of discovery reconstruction and interpretation come to the fore accompanied by a full bibliography At that the reader will find descriptions of astronomical contents an explanation of their scientific meaning and the place a given genre or tablet has in the development of astronomy both within the Mesopotamian culture and outside of it Because celestial omens are intimately related to astronomy in Mesopotamian science these are also discussed extensively The material is arranged both chronologically and thematically so as to help make *Astral Sciences in Mesopotamia* a reference work on the subject in its truest sense **B.H. active spirit of a perceived cosmic serpent He traces this serpent motif throughout history identifying it with the biblical serpent of Eden the kundalini of Vedic tradition and the black snake of the Yezidis He demonstrates how the belief in the existence of the Milky Way serpent among the inhabitants of Karahan Tepe went on to influence the foundation of the Gnostic Ophite mysteries suppressed by the Christian Church He also shows how the founders of Karahan Tepe were recalled in Hebrew myth and legend as the Watchers and Nephilim and in Sumerian and Babylonian mythology as the Anunnaki Sharing a wealth of evidence Collins confirms that Karahan Tepe and its sister site of G bekli Tepe belonged to the world s first post Ice Age civilization which today bears the enigmatic name of Ta Tepeler The Publishers Weekly ,1900
