The causes of violence and conflict are often left untheorized or they are discussed as an existent problem assumed to be an inevitable part of human interaction. Adopting an accessible approach, this volume presents readers with a clear understanding of the causes of violence and conflict by highlighting their evolutionary roots and illustrating them with in-depth case studies and examples. Tim Jacoby addresses the fragmented nature of the literature on conflict theory by drawing upon a wide range of disciplinary traditions seeking to reflect the fact that international relations, history, economics, development, politics, and sociology all share a long-standing interest in the study of conflict and violence and that common concerns make interdisciplinary stimulating and productive. **Understanding Conflict and Violence** will be of interest to students and scholars across the disciplines of international relations, history, economics, development, politics, and sociology. **English Mechanic and Mirror of Science and Art**, 1873 *Education and the Democratic Ideal* Steven M. Cahn, 2004-01-27 Steven M. Cahn has succeeded in articulating a defense of a particularly valuable conception of higher education in the liberal arts. He presents acute logical analyses in a clear, readable style. In particular, his critique of a too facile concern with relevance, his insistence on the importance of standards, and above all, his account of the importance of liberal arts education to democracy should be read by educators and policymakers alike. Even those who ultimately reject Cahn's position surely would profit from having to wrestle with his arguments. ROBERT L. SIMON, Professor of Philosophy, Hamilton College, Clinton, New York. *Education and the Democratic Ideal* is a closely reasoned study of grading, assignments, examinations, and other tactical issues. Because of this, it is a real departure from most discussion of university education and the more to be valued. RONALD BERMAN, Past Chairman, National Endowment for the Humanities. *Encyclopedia of Mathematical Geosciences* B. S. Daya Sagar, Qiuming Cheng, Jennifer McKinley, Frits Agterberg, 2023-07-13 The *Encyclopedia of Mathematical Geosciences* is a complete and authoritative reference work.
