Crisis and Opportunity John E. Ikerd, 2008. With the decline of family farms and rural communities and the rise of corporate farming and the resulting environmental degradation, American agriculture is in crisis. But this crisis offers the opportunity to rethink agriculture in sustainable terms. Here, one of the most eloquent and influential proponents of sustainable agriculture explains what this means. These engaging essays describe what sustainable agriculture is, why it began, and how it can succeed. Together, they constitute a clear and compelling vision for rebalancing the ecological, economic, and social dimensions of agriculture to meet the needs of the present without compromising the future. In *Crisis and Opportunity*, John E. Ikerd outlines the consequences of agricultural industrialization, then details the methods that can restore economic viability, ecological soundness, and social responsibility to our agricultural system and thus ensure sustainable agriculture as the foundation of a sustainable food system and a sustainable society.

Tending Animals in the Global Village David M.

Sherman, 2007-11-27. A book like no other in the field of veterinary medicine, with pertinent information every student and practitioner will find beneficial. Veterinarians have access to a great variety of texts, journals, and continuing education opportunities to keep them on top of the tremendous technological advances in clinical care and preventive medicine. Outside of the technical realm, however, there are many global trends which exert profound effects on how the veterinary profession serves society and how veterinary professionals define their role in a rapidly changing world. This new and unrivaled book delves into these influences in impressive detail, identifying new challenges and opportunities for the veterinary profession in a global context. Unique topics covered include:
