Body Maps
Lan A. Li,2025-04-15 A historical and cultural study of how representing invisible anatomical structures has reshaped our understanding of human anatomy In Body Maps Lan A Li unveils a rich history of the hidden landscapes of the human body This compelling study explores the world of invisible anatomy explaining how hand drawn body maps have shaped our understanding of the human form across cultures and centuries From the meridian charts in East Asian medicine to neurophysiological illustrations Body Maps traces the evolution of anatomical representation from the tenth to the twentieth centuries Drawing on case studies across time and place from Kaifeng to Dejima and from Beijing to Berlin Li expertly navigates the complex interplay between Eastern and Western medical traditions At the heart of this history remains a perennial mystery How did representations of jingluo meridians become intertwined with and sometimes subsumed by concepts of nervous anatomy By examining the graphic history of these invisible structures Body Maps challenges our assumptions about the stability of medical knowledge and invites us to reconsider the nature of anatomical reality Each chapter opens with a single image and explores how practitioners negotiated between materiality and metaphor with the

nature of the body and the symbols used to represent it Body Maps is a thought provoking exploration of how images shape our understanding of the world By bringing together insights from the history of science postcolonial studies art history Chinese studies critical cartography and medical anthropology Li offers a fresh perspective on the cultures of objectivity that have defined our approach to the human body

Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners. As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies. Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy, herbal medicine, osteopathy, chiropractic and naturopathy. Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere. What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK. Complementary medicine in Australia encompasses many medical systems and therapies. Since the 1980s certain heterodox medical systems particularly chiropractic, osteopathy, acupuncture and Chinese medicine, naturopathy, Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels. Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education. Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States.
