Endangered Animals Brian Miller,Richard P. Reading,2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate conservation practice and to draw their own conclusions for improvement **In the Company of Crows and Ravens** John M. Marzluff,Tony Angell,2008-10-01 Crows

and people share similar traits and social strategies To a surprising extent to know the crow is to know ourselves from the Preface From the cave walls at Lascaux to the last painting by Van Gogh from the works of Shakespeare to those of Mark Twain there is clear evidence that crows and ravens influence human culture Yet this influence is not unidirectional say the authors of this fascinating book people profoundly influence crow culture ecology and evolution as well John Marzluff and Tony Angell examine the often surprising ways that crows and humans interact The authors contend that those interactions reflect a process of cultural coevolution They offer a challenging new view of the human crow dynamic a view that may change our thinking not only about crows but also about ourselves Featuring more than 100 original drawings the book takes a close look at the influences people have had on the lives of crows throughout history and at the significant ways crows have altered human lives In the Company of Crows and Ravens illuminates the entwined histories of crows and people and concludes with an intriguing discussion of the crow human relationship and how our attitudes toward crows may affect our cultural trajectory **The Wake of Crows** Thom van Dooren,2019-10-01 Crows can be found almost everywhere that

people are from tropical islands to deserts and arctic forests from densely populated cities to suburbs and farms Across these diverse landscapes many species of crow are doing well their intelligent and adaptive ways of life have allowed them to thrive

amid human driven transformations Indeed crows are frequently disliked for their success seen as pests threats and scavengers on the detritus of human life But among the vast variety of crows there are also critically endangered species that are barely hanging on to existence some of them the subjects of passionate conservation efforts The Wake of Crows is an exploration of the entangled lives of humans and crows Focusing on five key sites Thom van Dooren asks how we might live well with crows in a changing world He explores contemporary possibilities for shared life emerging in the context of ongoing processes of globalization colonization urbanization and climate change Moving among these diverse contexts this book tells stories of extermination and extinction alongside fragile efforts to better understand and make room for other species Grounded in the careful work of paying attention to particular crows and their people The Wake of Crows is an effort to imagine and put into practice a multispecies ethics In so doing van Dooren explores some of the possibilities that still exist for living and dying well on this damaged planet

Population Viability Analysis Steven R. Beissinger, Dale R.

McCullough, 2002-05-04 Many of the world's leading conservation and population biologists evaluate what has become a key tool in estimating extinction risk and evaluating potential recovery strategies population viability analysis or PVA

Canine Ergonomics William S. Helton, 2009-04-28 Since *Canis lupus familiaris* first shared a fire with man more than 15 000 years ago dogs have been trusted and valued coworkers Yet the relatively new field of canine ergonomics is just beginning to

unravel the secrets of this collaboration As with many new fields the literature on working dogs is scattered across several non overlapping disciplines

Diagnosis and Control of Johne's Disease National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Diagnosis and Control of Johne's Disease, 2003-09-13

Johne's Disease is a chronic progressive intestinal disease caused by infection with *Mycobacterium avium* subspecies paratuberculosis Map that affects primarily ruminant animals In recent decades there has been growing concern over the lack of effective control of this disease and questions have arisen regarding the possibility that Map infection could be a cause of some cases of Crohn's disease in humans This report presents a broad outline of the steps that should be taken to control Johne's disease reduce the spread of Map and minimize effects of the disease in animals The report also describes the weaknesses of our current research agenda and provides recommendations for a new research strategy to resolve the question of whether there is a link between Johne's and Crohn's diseases

Global Change Ecosystems Research National Research Council, Oversight Group for the Ecosystems Panel, Ecosystems Panel, 2001-01-19 Research Council established the Ecosystems Panel in response to a request from the United States Global Change Research Program USGCRP The panel's charge included periodic reviews of the ecosystems aspects of the USGCRP and this is the first of those reviews It is based on information provided by the USGCRP including Our Changing Planet NSTC 1997 and earlier editions 1 ideas and conversations provided by participants in a workshop held in St Michaels Maryland in July 1998 and the deliberations of the panel In addition the panel reviewed the ecosystems chapter of the NRC report Global Environmental Change Research

Pathways for the Next Decade NRC 1999a known as the Pathways report The USGCRP is an interagency program established in 1989 and codified by the Global Change Research Act of 1990 PL 101 606 The USGCRP comprises representatives of the departments of Agriculture Commerce National Oceanic and Atmospheric Administration and National Institute of Standards and Technology Defense Energy Health and Human Services the National Institute of Environmental Health Sciences Interior and State as well as the Environmental Protection Agency the National Aeronautics and Space Administration the National Science Foundation the Smithsonian Institution the Office of Science and Technology Policy the Office of Management and Budget and the intelligence community NSTC 1997 The USGCRP s research program is described in detail in Our Changing Planet NSTC 1997 1999 In brief the program focuses on four major areas of earth system science 1 Seasonal to interannual climate variability 2 Climate change over decades to centuries 3 Changes in ozone ultraviolet UV radiation and atmospheric chemistry and 4 Changes in land cover and in terrestrial and aquatic ecosystems The fourth topic is the area in which advice was requested from the ecosystems panel The Ecosystems Panel s charge has three parts to provide a forum for the discussion of questions of ecosystem science of interest to scientists in and out of the federal agencies to periodically review the ecosystem aspects of the USGCRP s research program and to help identify general areas of ecosystem science that need additional attention especially areas that cut across ecosystems and levels of ecological organization In addressing the second item of its charge for this report the panel first identified the most significant and challenging areas in ecosystem science then used that identification as a basis to make recommendations to the USGCRP Thus this report is not a detailed review of the USGCRP s program but rather an attempt to identify those areas that the panel concludes are most in need of attention by a general research program on global change As noted in this report some of those areas are already receiving attention by the USGCRP

Evaluating Human Genetic Diversity National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Human Genome Diversity, 1998-02-19 This book assesses the scientific value and merit of research on human genetic differences including a collection of DNA samples that represents the whole of human genetic diversity and the ethical organizational and policy issues surrounding such research *Evaluating Human Genetic Diversity* discusses the potential uses of such collection such as providing insight into human evolution and origins and serving as a springboard for important medical research It also addresses issues of confidentiality and individual privacy for participants in genetic diversity research studies
