Scientific Survey Of The Cambridge Distr:

A scientific survey of the Cambridge district, edited by H.C. Darby British Association for the Advancement of Science,1938 **A Bibliography of British History, 1914-1989** Keith Robbins,American Historical Association,Royal Historical Society (Great Britain),1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index **A Century of British Geography** Ron Johnston,Michael Williams,British Academy,2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today s geographers **The English Resistance** Peter Rex,2014-05-15 The first history of this forgotten English underground struggle against the invading Normans *A Flora of Cambridgeshire* John Ray,1971

Ecology and Enclosure Shirley Wittering,2013-02-07 South Cambridgeshire has some of the richest arable land in England and has been cultivated for millennia By the turn of the nineteenth century industrialisation and massive population growth had resulted in an enormous increase in the demand for food which in turn led to enclosure But this desire to plough every available piece of land resulted in the destruction of many valuable and distinctive habitats that had existed for centuries The Ecology of Enclosure breaks new ground in comparing the effect of Parliamentary Enclosure with the findings of the enthusiastic Botanisers from Cambridge this reveals not only the effect of enclosure on the ecology of the land but also on the people whose link with the land was broken The first section presents a study of social and agricultural life before enclosure describing geology and climate the fold course open field system of farming and the strict stinting rules which governed how land could be used for grazing and stock movement and the crop rotation systems employed The second part describes the process of enclosure including opposition to it the changes that occurred to the landscape and within village communities as work in industry gradually replaced rural occupations the effects of fencing on movement and of the loss of common land to the plough The third section is an analysis of the new study of Botany which the University of Cambridge was enjoying in the eighteenth and nineteenth centuries based on their own records and a review of some of the specific effects on the flora and fauna of the area **Standard Distribution for Unclassified Scientific and Technical Reports** United States. Energy Research and Development Administration. Technical Information Center,1969 *Annual Report of the Board of Regents of the Smithsonian Institution* Smithsonian Institution. Knowledge Generation and Distribution Pier Paolo Patrucco, 2014-09-25 Contemporary capitalistic systems have been undergoing profound transformations determined by the transition towards the so called knowledge based economy i.e. a competitive system based on the capabilities firms have to create use and circulate knowledge. These transformations concern both the characteristics of productive and innovative processes and the resources used in these activities. This book captures these changes where traditional R & D investments undertaken internally by firms are increasingly and strategically complemented by external sources of innovation and new knowledge. Collaborations between firms and between firms and other organizations as well as the mobility of human capital are strategic processes in order to share and circulate knowledge and competencies. They are also key determinants in the creation of new knowledge and innovation and ultimately in growth dynamics. The circulation and distribution of knowledge is now a key input in the production of knowledge. Knowledge and innovation are understood as the result of collective and interactive processes at the system level and less at the micro level. In other words, new knowledge production is less and less the result of individualistic behaviours of the firms and much more the effect of explicit and proactive interactions and transactions put in place by local networks of innovators. In this perspective, economic space is much more defined by the quality of the interactions among actors rather than by their mere technological, sectoral or geographical proximity. This book brings together new conceptual and empirical contributions and blends the analysis of the technological and geographical spaces in which innovation and knowledge are produced.

,2014-12-04 That the publics of Western democracies are becoming increasingly disenchanted with their political institutions is part of the conventional wisdom in Political Science This trend is often equated with the expectation that all forms of political attachment and participation show similar patterns of decline Based on empirical underpinnings derived from a range of original and sophisticated comparative analyses from Europe and beyond this collection shows that no such universal pattern of decline exists Nor should it be expected given the diversity of reasons that citizens have to place or withdraw trust and to engage in conventional political participation or in protest Contributors are Christoph Arndt Wiebke Breustedt Christina Eder Manfred te Grotenhuis Alexia Katsanidou Rik Linssen Michael P McDonald Ingvill C Mochmann Kenneth Newton Maria Oskarson Suzanne L Parker Glenn R Parker Markus Quandt Peer Scheepers Hans Schmeets Thoralf Stark and Terri L Towner
