Handbook of Public Communication of Science and Technology Massimiano Bucchi, Brian Trench, 2008-06-03. Comprehensive yet accessible, this key Handbook provides an up to date overview of the fast growing and increasingly important area of public communication of science and technology from both research and practical perspectives. As well as introducing the main issues, arenas and professional perspectives involved, it presents the findings of earlier research and the conclusions previously drawn. Unlike most existing books on this topic, this unique volume couples an overview of the practical problems faced by practitioners with a thorough review of relevant literature and research. The practical Handbook format ensures it is a student friendly resource, but its breadth of scope and impressive contributors means that it is also ideal for practitioners and professionals working in the field. Combining the contributions of different disciplines, media and journalism studies, sociology and history of science, the perspectives of different geographical and cultural contexts and by selecting key contributions from appropriate and well respected authors, this original text provides an interdisciplinary as well as a global approach to public communication of science and technology.

Historical Studies in Information Science Trudi Bellardo Hahn, Michael Keeble Buckland, 1998. The 25 contributions to this volume, largely reprinted from recent special issues of three information science journals devoted to historical topics, address an array of topics including Paul Otlet and his successors, techniques, tools and systems, organizations and individuals, theoretical issues and literature.
