Papers also explore aspects of Hong Kong's marine parks and reserves including the pollution of Hong Kong's marine life with particular reference to the Cape d'Aguiar Marine Reserve established only in 1996 and the fauna of its territorial southern waters. The Workshop was sponsored by the University of Hong Kong, the Croucher Foundation and the K. C. Wong Foundation so as to bring eminent overseas scientists to Hong Kong to work with their local colleagues and students. The success of the workshop concept is self-evident in the contents and scope of these proceedings. This was the eighth workshop convened in Hong Kong since 1977 and these proceedings have become the single most important body of information on the long-term changes that have taken place in its marine environment over an extended time frame. The volumes are also the largest regional repository of information on the marine life of the territorial waters of Hong Kong and the northern rim of the South China Sea. For those with any interest in Hong Kong's marine environment, therefore, these proceedings and its predecessors are essential reading.
