Kikuchi, 2012-10-09 12:09:00 A.D. It is a dark time for the world. Humanity is just crawling out from under three hundred years of domination by the race of vampires known as the Nobility. The war against the vampires has taken its toll: cities lie in ruin, the countryside is fragmented into small villages and fiefdoms that still struggle against nightly raids by the fallen vampires and the remnants of their genetically manufactured demons and werewolves. Every village wants a Hunter, one of the warriors who have pledged their laser guns and their swords to the eradication of the Nobility. But some Hunters are better than others, and some bring their own kind of danger with them. From creator Hideyuki Kikuchi, one of Japan's leading horror authors, with illustrations by renowned Japanese artist Yoshitaka Amano, best known for his illustrations in Neil Gaiman's *Sandman*, *The Dream Hunters*, and the *Final Fantasy* games.

Abstraction in Science and Art Chiara Ambrosio, Julia Sánchez-Dorado, 2024-09-30. This volume explores the roles and uses of abstraction in scientific and artistic practice. Conceived as an interdisciplinary dialogue between experts across histories and philosophies of art and science, this collection of essays draws on the shared premise that abstraction is a rich and generative process, not reducible to the mere omission of details in a representation. When scientists attempt to make sense of complex natural phenomena, they often produce highly abstract models of them. In the history and philosophy of art, there is a long tradition of debate on the function of abstraction, and more recently its relation with theories of depiction. Adopting a process-oriented perspective, the chapters in this volume explore the epistemic potential of a diversity of practices of abstracting. The systematic analysis of a wide range of historical cases, from early twentieth-century abstractionist painting to contemporary abstract photography, and from nineteenth-century physics to recent research in biology and neurosciences, invites the reader to reflect on the material lives of abstraction through concrete artefacts, experimental practices, and theoretical and aesthetic achievements. *Abstraction in Science and Art: Philosophical Perspectives* will be of interest to scholars and advanced students working in aesthetics, philosophy of science, and epistemology, as well as to historians of science and art, and to practicing artists and scientists interested in exploring foundational questions at the heart of the creative practice of abstracting.
