**Cults in Context** Lorne Dawson, 2018-02-06

In the face of the increasingly variegated ideological landscape of contemporary America cults have become the focus of public controversy The growth of new religions has been matched by the development of an organized and vocal opposition the anti cult movement This in turn has prompted an extensive investigation of new religious movements NRMs by sociologists and psychologists of religion as well as historians and religious studies scholars The readings collected here contribute to the debate about cults by sampling some of the best and most accessible publications from the academic study of NRMs The contributors address the questions most commonly asked about cults such as What brought about the emergence of new religious movements What is a cult or new religious movement Who joins new religious movements and why Are converts to new religious movements brainwashed Why did the Jonestown and Waco tragedies happen Are cults inclined to be violent What does the emergence of so many new religious movements say about our society What does it say about the future of religion Cults in Context surveys the descriptive typologies theories and data accumulated by sociologists and psychologists studying new religious movements over the last twenty years It serves to defuse many popular fears and misconceptions about cults allowing the reader to develop a more reasonable and tolerant understanding of the people who

join new religious movements and the functions of these movements in contemporary society      The Marine Corps Gazette

including political conversations regardless of the site s main purpose But what leads some of these people to take their  
online political activity into the offline world of activism In Expect Us Jessica L Beyer looks at political consciousness and  
action in four communities each born out of chaotic online social spaces that millions of individuals enter spend time in and  
exit moment by moment Anonymous 4chan IGN World of Warcraft and The Pirate Bay None of these sites began as places for  
political organization per se but visitors to each have used them as places for political engagement to one degree or another  
Beyer explains the puzzling emergence of political engagement in these disparate social spaces and offers reasons for their  
varied capacity to generate political activism Her comparative ethnography of these four online communities demonstrates  
that the technological organization of space itself has a strong role in determining the possibility of political mobilization  
Overall she shows that political mobilization rises when a site provides high levels of anonymity low levels of formal  
regulation and minimal access to small group interaction Furthermore her findings reveal that young people are more  
politically involved than much of the civic engagement literature suggests Expect Us offers surprising and compelling  
insights for anyone interested in understanding which factors and online environments lead to the greatest amount of impact
