we have come to live by It demonstrates that the Anglo Saxon invasions contributed just a tiny fraction 5% to the English gene pool Two thirds of the English people reveal an unbroken line of genetic descent from south western Europeans arriving long before the first farmers The bulk of the remaining third arrived between 7 000 and 3 000 years ago as part of long term north west European trade and immigration especially from Scandinavia and may have brought with them the earliest forms of English language As for the Celts the Irish Scots and Welsh history has traditionally placed their origins in Iron Age Central Europe Oppenheimer s genetic synthesis tells a different story There is indeed a deep divide between the English and the rest of the British But as this book reveals the division is many thousands of years older than previously thought Be prepared to have all your cherished notions of English history and Britishness swept away Clive Gamble *From Genesis to Prehistory* Peter Rowley-Conwy,2007-11 We are now familiar with the Three Age System the archaeological partitioning of the past into Stone Age Bronze Age and Iron Age This division which amounted at the time to a major scientific revolution was conceived in Denmark in the 1830s Peter Rowley Conwy investigates the reasons why the Three Age system was adopted without demur in Scandinavian archaeological circles yet was the subject of a bitter and long drawn out contest in Britain and Ireland up to the 1870s **Exploring Prehistoric Identity in Europe** Victoria Ginn,Rebecca Enlander,Rebecca Crozier,2014-03-19 Identity is relational and a construct and is expressed in a myriad of ways For example material culture and its pluralist meanings have been readily manipulated by humans in a prehistoric context in order to construct personal and group identities Artefacts were often from or reminiscent of far flung places and were used to demonstrate membership of an imagined regional or European community Earthworks frequently achieve maximum visual impact through elaborate ramparts and entrances with the minimum amount of effort indicating that the construction of identities were as much in the eye of the perceiver as of the perceived Variations in domestic architectural style also demonstrate the malleability of identity and the prolonged intermittent use of particular places for specific functions indicates that the identity of place is just as important in our archaeological understanding as the identity of people By using a wide range of case studies both temporally and spatially these thought processes may be explored further and diachronic and geographic patterns in expressions of identity investigated **Orientation of Prehistoric Monuments in Britain: A Reassessment** Alistair Marshall,2021-07-08 Reassesses major axial alignment at many megalithic ritual and funerary monuments Neolithic to Bronze Age in Britain and Ireland not in terms of abstract astronomical concerns but as an expression of repeated seasonal propitiation involving community agrarian economy and ancestry in an attempt to mitigate variable environmental conditions
