**Birds in Scotland** Valerie M. Thom, 2010-11-30 The most important work on the birds of Scotland ever published British Birds This comprehensive study and review of the birds in Scotland follows on from where the celebrated two volumes of The Birds of Scotland 1953 by Dr Baxter and Miss Rintoul left off It does more than that however since not only has there been a profound increase in ornithological coverage and data as reflected in the species accounts there have also been great changes in habitat and environment since the days of Baxter there are also brief summaries of earlier data based on the researches of Baxter Rintoul In all 497 species are dealt with The texts of major species accounts are complemented by 173 distribution maps and many tables of relevant data and there are 129 species drawings by a team of artists under the editorship of Donald Watson who also contributes chapter head pieces and other drawings A section of photographs illustrates the varied habitats typical of Scotland today There are further appendices and an extensive bibliography The book will be of great interest to all birdwatchers in Scotland but of special value too to the many thousands of birdwatching visitors from elsewhere in these islands and from countries abroad The Scottish Ornithologists Club for whom the book is published and all whose records and researches made the author's work possible have reason to be proud of Valerie Thom's achievement

**Birds in North-East Scotland Then and Now** Adam Watson, Ian Francis, 2012 Field observations mainly in the 1940s and comparison with recent records Adam Watson as a schoolboy made field observations on birds in north east Scotland during the 1940s and early 1950s These are of special interest because hardly any local ornithologists lived there and his main set of observations is published here for the first time As well as accounts for all species seen there is detailed information on several species whose status has changed greatly since declines of breeding greenshanks and ring ouzels and rapid increases in the proportions of feral doves and carrion crows These and other observations form a useful baseline for comparison with what is now being seen and recorded by hundreds of ornithologists living in and visiting the area Ian Francis came to north east Scotland in the early 1990s and has taken part in many aspects of local ornithology He was first editor of a major book The Breeding Birds of North East Scotland published in 2011 which documents the current breeding distributions of birds and assesses changes over 40 years allowing a modern perspective on Adam Watson's observations from the mid 1900s The current book by Adam Watson and Ian Francis Birds in north east Scotland then and now also includes a previously unpublished account of long term research by Adam Watson Rik Smith and Mick Marquiss on
