Video and DVD Industries Paul McDonald, 2019-07-25 When the videocassette recorder was launched on the consumer market in the mid 1970s it transformed home entertainment Bringing together complementary but also competing interests from the consumer electronics industry and the film television and other copyright industries video created a new sector of media business Two decades later DVD reinvented video media for the digital age DVD provided consumers with an innovative form of entertainment technology and almost instantaneously became the catalyst for a huge boom in the video market Although the VCR and DVD created major markets for video hardware and software the video business has been continually shaped by industry conflicts and tensions Repeatedly the video market has become divided when faced with the introduction of competing formats Easy reproduction of films and other works on cassette or disc made video software a lucrative market for the copyright industries but also intensified struggles to combat the effects of commercial piracy Video and DVD Industries examines the business of video entertainment and provides the first study looking at DVD from an industrial perspective Detailing divisions in the video business the book outlines industry battles over incompatible formats from the Betamax VHS war to competing laserdisc systems alternatives such as video compact disc or Digital Video Express and the introduction of HDDVD and Blu ray high definition systems Chapters also look at the formation of international markets in the globalization of video media the contradictory responses of the Hollywood studios to video and DVD and the legal and technological measures taken to control industrialized video piracy **World Politics on Screen** Mark A.

Sachleben, 2014-03-04 Increasingly resistant to lessons on international politics society often turns to television and film to engage the subject Numerous movies made in the twentieth and twenty first centuries reflect political themes that were of concern within the popular cultures of their times For example Norman Jewison's The Russians Are Coming The Russians Are Coming 1966 portrays the culture of suspicion between the United States and the Soviet Union during the Cold War while several of Alfred Hitchcock's movies as well as the John Wayne film Big Jim McLain 1952 and John Milius's Red Dawn 1984 helped to raise and sustain skepticism about the Soviet Union World Politics on Screen Understanding International Relations through Popular Culture uses films and television shows like these as well as contemporary including 24 The Simpsons South Park and The Daily Show to guide readers to a deeper understanding of enduring issues in international politics In this unique and insightful volume author Mark Sachleben demonstrates that popular culture reflects societal beliefs about the world and that the messages captured on television and film transcend time and place Using films such as Secret Ballot 2001 Under the Bombs 2007 and Wall E 2008 he addresses topics such as international relations and diplomacy the study of war nuclear weapons poverty immigration and emigration human rights and genocide An engaging read for students and for anyone with a general interest in politics and popular culture World Politics on Screen succeeds in its argument by illuminating unexplored assumptions about international policy *Transforming Images* Rebecca

Coleman,2015-01-28 Contemporary social and cultural life is increasingly organised around a logic of self transformation where changing the body is seen as key Transforming Images examines how the future functions within this transformative logic to indicate the potential of a materially better time The book explores the crucial role that images have in organising an imperative for transformation and in making possible or not the materialisation of a better future Coleman asks the questions which futures are appealing and to whom How do images tap into and reproduce wider social and cultural processes of inequality Drawing on the recent turns to affect and emotion and to understanding life in terms of vitality intensity and liveness in social and cultural theory the book develops a framework for understanding images as felt and lived out Analysing different screens across popular culture the screens of shopping makeover television programmes online dieting plans and government health campaigns it traces how images of self transformation bring the future into the present and affectively draw in some bodies more than others Transforming Images will be of interest to students and scholars working in sociology media studies cultural studies and gender studies

Experiencing Environment and Place through Children's Literature Amy Cutter-Mackenzie, Phillip Payne, Alan Reid, 2014-06-11 Recent scholarship on children's literature displays a wide variety of interests in classic and contemporary children's books While environmental and ecological concerns have led to an interest in ecocriticism as yet there is little on the significance of the ecological imagination and experience to both the authors and readers young and old of these texts This edited collection brings together a set of original international research based chapters to explore the role of children's literature in learning about environments and places with a focus on how children's literature may inform and enrich our imagination experiences and responses to environmental challenges and injustice Contributions from Australia Canada USA and UK explore the diverse ways in which children's literature can provide what are arguably some of the first and possibly most formative engagements that some children might have with nature Chapters examine classic and new storybooks mythic tales and image based and or written texts read at home in school and in the field Contributors focus on exploring how children's literature mediates and informs our imagination and understandings of diverse environments and places and how it might open our eyes and lives to other presences understandings and priorities through stories their telling and re telling and their analysis This book was originally published as a special issue of Environmental Education Research

Institutions, Interaction and Social Theory Will Gibson, Dirk vom Lehn, 2016-01-01 From hospitals and prisons to schools and corporations no matter how large or seemingly abstract all institutions are ultimately the result of the actions and interactions of people In this original and innovative text Gibson and Vom Lehn show the different ways in which studying people's own meaning making practices can help us understand the role of institutions in contemporary society Institutions Interaction and Social Theory takes the reader through the core conceptual foundations of Symbolic Interactionism Ethnomethodology and Conversation Analysis Engaging with a rich tradition in sociological thought it suggests that interactionist perspectives have remained largely absent in the study of institutions and how they contrast with and contribute to the broader field of research in institutional contexts With chapters on healthcare education markets and art and culture this text will be of interest to those studying institutions organisations and work in sociology and in business schools It will also be valuable for students of social theory interested in interactionism and in the challenges and opportunities of connecting complex theoretical discussions to real world examples
