Screening For Brain Dysfunction In Psychiatric Patients:

Screening for Brain Dysfunction in Psychiatric Patients Cooper B. Holmes, 2014-05-14 This book presents how medical diseases can be misdiagnosed as psychiatric disorders and how clinicians without extensive training in the neurosciences can do a competent job of screening psychiatric clients for possible brain disorders In the author's work he has seen over and over again how medical diseases can present with what appear to be classic psychological symptoms The client is not only misdiagnosed but is then denied the medical treatment he or she needs The research cited in this book dating back to the 1890s establishes beyond a doubt that such misdiagnoses are more common than most clinicians would guess This book focuses on one type of medical condition that is likely to be misdiagnosed brain injuries and illnesses The psychological consequences of known brain injuries and illnesses have been adequately addressed in the literature and will not be a part of this book Rather this book examines the situation in which a person comes for psychiatric help but in reality has an as yet unknown brain problem Clearly the consequences of a misdiagnosed brain disorder can range from at best improper treatment to at worst a life threatening situation By presenting and discussing the signs that are available to clinicians in the course of their usual work with clients this book will help clinicians screen for brain problems and recognize when the client should be referred to a specialist for further evaluation *Screening for Brain Dysfunction in Psychiatric Patients* Cooper B. Holmes, 1998 [Screening for Brain Impairment](#) Glen E. Getz, Michael D. Franzen, 2010-03-29 Written by top practitioners in the field of neuropsychological screening Screening for Brain Impairment is the extensively updated new edition of the classic resource Valuable to a broad range of medical and mental health practitioners this new edition reflects enormous changes to the field over the past 13 years Each chapter contains updated information and new empirical data including extensive information on neurological and psychiatric disorders adult attention deficit disorder and screening for and assessing the emotional correlates of brain impairment Also included are new chapters on computerized assessment and developing relations with other professionals including clinical neuropsychologists neurologists primary care physicians neurosurgeons and psychiatrists **Bender Gestalt Screening for Brain Dysfunction** Patricia Lacks, 1984 **Research Grants Index** National Institutes of Health (U.S.).
