**Lake Alchichica Limnology** Javier Alcocer, 2022-03-04 The book provides a comprehensive account of a tropical lake Alchichica considering that tropical limnology is by far less known and well understood than temperate. Many of the well-known temperate limnology paradigms do not apply in tropical limnology such as the 10°C thermocline concept or the role of phosphorus as a limiting nutrient. Lake Alchichica is most likely the best limnologically known Mexican lake up to date. Twenty years of continuous monitoring has led us to understand this deep warm monomictic lake. The peculiar chemical composition of this saline lake sodium alkaline with a high concentration in magnesium waters and groundwater fed led to the formation of its unique stromatolite ring that has become world famous studied by scientists from various countries. From a biological point of view this relatively small maar lake displays a comparatively low species richness but surprisingly is plentiful in microendemic species for a recently formed lake 13 000 to 300 years old at the Late Pleistocene Holocene Epoch eleven of which already described with more to come. Researchers and students interested in tropical limnology extreme ecosystems evolutionary biology astrobiology and microbiology will find this book a must read.
