**Individual Family & Community** Phoebe A. Dautz-Williams, Arthur R. Williams, 2000 *Beyond Endurance* Ronald J. Christ, Kalman Flomenhaft, 2012-12-06 The past decade has brought extraordinary gains in the outlook for children stricken with cancer Though cancer remains a leading cause of death for children and young adults more victims of childhood cancer today will survive than will die The therapeutic advances and the optimism they instill have prompted researchers and clinicians to analyze the impact of cancer upon young patients and their families and to devise more effective intervention strategies Hope and survival juxtaposed with the continuing high mortality associated with certain forms of the illness add new challenges to management of the psychosocial aspects of cancer To respond to these challenges we need research as rigorous as that which continues to make inroads in treating the physical illness This specific concern for the needs of children suffering from cancer and their families has paralleled an increasing sensitivity on the part of the medical community and the public at large to the limitations of specialized high technology health care practices A Comprehensive Bibliography of the Thanatology Literature Martin L. Couture, 2013-11-22 This book developed out of the editors longstanding interest in the retraining of traumatically brain damaged adults and the

management of their behavior by family members A search for relevant experimental evidence to support the clinical use of behavioral principles for retraining which began in 1977 turned up little empirical support Moreover the literature on retraining was dispersed among a variety of journals published in various countries Nowhere was there a compendium of literature that addressed issues of assessment and retraining There was no place to turn if one wanted to move from a standard neuropsychological evaluation to the retraining of skill deficits revealed in the evaluation We have attempted to edit a book that represents what we had hoped to find in the literature and could be used by professionals in clinical psychology clinical neuropsychology rehabilitation medicine physical therapy speech therapy and other disciplines that address rehabilitation of brain damaged adults a book that addresses assessment and rehabilitation issues and is sufficiently detailed to offer the reader a starting point in developing behavioral assessment and rehabilitation programs The book contains conceptual foundations reviews of research descriptions of successful rehabilitation programs and relatively detailed approaches to the retraining of specific skills A shift from an assessment based practice to one encompassing both prescriptive assessment and treatment has become a recognized transition in the neuropsychological literature and was best articulated in an article by Gerald Goldstein in March of 1979

**Personality, Roles, and Social Behavior** W. Ickes, E.S. Knowles, 2012-12-06 Personality and Roles Sources of Regularities in Social Behavior For behavioral scientists whether they identify primarily with the science of psychology or with that of sociology there may be no challenge greater than that of discovering regularities and consistencies in social behavior After all it is such regularities and consistencies that lend predictability to the behavior of individuals in social

contexts in particular to those events that constitute dyadic interactions and group processes In the search for behavioral consistencies two theoretical constructs have emerged as guiding principles personality and roles The theoretical construct of personality seeks to understand regularities and consistencies in social behavior in terms of relatively stable traits enduring dispositions and other propensities for example needs motives and attitudes that are thought to reside within individuals Because it focuses primarily on the features of individuals the construct of personality is fundamentally psychological in nature By contrast the theoretical construct of roles seeks to understand regularities and consistencies in social behavior in terms of the directive influence of coherent sets of rules and prescriptions that are provided by the interpersonal occupational and societal categories of which individuals are continuing members Because it focuses primarily on features of social structures the construct of roles is fundamentally sociological in nature
