Medical and Health Care Books and Serials in Print ,1997 Foundations

of Health Psychology Howard S. Friedman, Roxane Cohen Silver, 2007 Health psychology is the scientific study of psychological processes related to health and health care. Although the field is only 25 years old, it has burgeoned into a major scientific and clinical discipline. Health psychology has excellent scientific journals, thousands of scientists and practitioners, and many students. Yet there has not been a sufficient statement or explication of the foundational concepts upon which this flourishing field is built. *Foundations of Health Psychology* brings together top experts to provide a much needed conceptual base for this rapidly expanding field. Rather than take a medical model approach, the volume examines health psychology from a theoretical, conceptual, and psychological perspective. After presenting an overview of the field's history and methods, the contributors address core concepts of the biopsychosocial approach to health and then discuss applications to health promotion and illness prevention and treatment. Providing a deep understanding of the intellectual foundations of health psychology, this volume will be invaluable for both new and experienced researchers as well as students and other scholars seeking a firm basis for successful research and practice.

A Professional's Guide to Understanding Trauma and Loss David E. Balk, Tracy Wong, Janet R. Balk, 2023-06-05 The purpose of this book is to provide vital information regarding loss and trauma to practicing counselors and therapists. Trauma and loss are pervasive presenting problems; many counselors and therapists possess scant understanding of trauma and loss, and little if any attention is paid to trauma or to loss in the graduate training of clinical psychology and counseling psychology students. The book is organized into four sections which cover an overview of loss and trauma, key conceptual frameworks for understanding loss and trauma, review of several types of events producing trauma and loss, and interventions addressing loss and trauma. A key contribution of the book is the focus on losses caused by death and losses due to other reasons. The contributions to practice include the overview of what is known about trauma and about loss, examination of several frameworks for organizing both understanding of and working with traumatized and bereaved clients, rich descriptive cases of individuals coping with various traumatic events and the losses embedded in the trauma, and presentation of various interventions including changes that can be made in the graduate education of practitioners.
