Lost And Found Pb 2003:

The Happy Mind: Cognitive Contributions to Well-Being Michael D. Robinson, Michael Eid, 2017-06-28 This edited volume focuses on different views of happiness and well being considering constructs like meaning and spirituality in addition to the more standard constructs of positive emotion and life satisfaction A premise of the volume is that being happy consists of more than having the right things happen to us it also depends on how we interpret those events as well as what we are trying to achieve Such considerations suggest that cognitive emotional factors should play a fairly pronounced role in how happy we are The present volume pursues these themes in the context of 25 chapters organized into 5 sections The first section centers on cognitive variables such as attention and executive function in addition to mindfulness The second section considers important sources of positive cognition such as savoring and optimism and the third section focuses on self regulatory contributions to well being Finally social processes are covered in a fourth section and meaning related processes are covered in the fifth What results is a rich and diverse volume centering on the ways in which our minds can help or hinder our aspirations for happiness

Baudrillard and the Media William Merrin, 2005 Baudrillard and the Media is the first in depth critical study of Jean Baudrillard s media theory Rejecting the common positioning of Baudrillard within the discipline as a postmodernist it argues instead for the necessity of a fuller reading of his ideas and critical project Merrin offers an overview and evaluation of his key arguments and themes focusing especially upon the organising principle of his work his theory of symbolic exchange and critique of the semiotic and of simulation Upon this basis the book also resituates Baudrillard within media theory developing an original critical re reading of his relationship with McLuhanism and arguing for the significance instead of hitherto neglected influences such as Boorstin Emphasizing his critical value and contemporary relevance Baudrillard and the Media also provides the most detailed exploration yet of Baudrillard s theory of the non event considering its applicability through case studies of his controversial analyses of the Gulf War of 9 11 and the Afghan and Iraq Wars and of his own appearance in the film The Matrix Considering also Baudrillard s discussion of cinema his theory and personal practice of photography and his critique of new media the book concludes with an evaluation of his place within media and communication studies and an argument for his importance for this field Students and scholars of the media and media theory in particular will welcome this clear and comprehensive study
