compilers publishers patrons and subscribers and their cultural embedding generally This book raises questions such as who compiled dictionaries and what cultural linguistic and scientific notions drove this process What influence did the professional interests life experience and social connexions of the lexicographer have Who published dictionaries and why and what do the forematter backmatter and supplements tell us Lexicographers edited adapted and improved earlier works leaving copies with marginalia which illuminate working methods Individual copies offer a history of ownership through marginalia signatures dates places and library stamps Further questions concern how dictionaries were sold who patronised them subscribed to them and how they came to various libraries A Dictionary of Varieties of English Raymond

Kick the Bucket and Swing the Cat Alex Games,2011-01-31 Kick the Bucket and Swing the Cat takes a humorous tour through the fascinating sometimes tragic and often surprising history of the English language and its etymology Author humorist and word sleuth Alex Games uncovers the trends innovations and scandals that have shaped the meanings of our most popular words and expressions from Chaucer to Internet jargon and Ancient Greek to American slang Who was the original Jack the Lad Gordon Bennett or Bloody Mary Where do dodgy geezers and hooligans come from What are skeldering dithering and sabre rattling This amusing but rigorously researched account of English words and their origins combines the findings of the major BBC TV series and the nationwide Wordhunt and is an entertaining treasure trove for English language lovers everywhere *The Poetics of Scientific Investigation in Seventeenth-Century England* Claire Preston,2015-12-17 The writing of science in the period 1580 1700 is artfully diffidently carelessly boldly and above all self consciously literary The Poetics of Scientific Investigation in Seventeenth Century English Literature considers the literary textures of science writing its rhetorical figures neologisms its uses of parody romance and various kinds of verse The experimental and social practices of science are examined through literary representations of the laboratory of collaborative retirement of virtual epistolary conversation and of an imagined paradise of investigative fellowship and learning Claire Preston argues that the rhetorical generic and formal qualities of scientific writing are also the intellectual processes of early modern science itself How was science to be written in this period That question which piqued natural philosophers who were searching for apt conventions

of scientific language and report was initially resolved by the humanist rhetorical and generic skills in which they were already highly trained. At the same time non scientific writers enthralled by the developments of science were quick to deploy ideas and images from astronomy optics chemistry biology and medical practices. Practising scientists and inspired laymen or quasi scientists produced new adjusted or hybrid literary forms often collapsing the distinction between the factual and the imaginative between the rhetorically ornate and the plain. Early modern science and its literary vehicles are frequently indistinguishable. Scientific practice and scientific expression mutually involved. Among the major writers discussed are Montaigne Bacon Donne Browne Lovelace Boyle Sprat Oldenburg Evelyn Cowley and Dryden.

Early Modern Northern English Lexis Javier Ruano-García, 2010. The history of regional Englishes in the Early Modern period still presents numerous lacunae that need to be filled in order to provide a complete insight into the English linguistic setting at this time. This book aims to remedy these deficiencies in some measure. In particular this monograph seeks to shed light upon the history of Early Modern Northern English vocabulary by means of the first corpus of Early Modern texts where Northern linguistic traits are used for literary purposes. It provides a linguistically documented description of Northern words from a synchronic standpoint dealing with their distribution etymology as well as with some of their morphological and semantic characteristics. In addition this study offers a discussion of the Early Modern literary representations of Northern speech. A thorough revision of the treatment that Northern lexical items are given in contemporary and modern lexicographic sources is also presented together with a glossary that outlines the diachronic profile of the terms gathered.

Wittgenstein and Literary Studies Robert Chodat, John Gibson, 2023-02-23. Wittgenstein is often regarded as the most important philosopher of the twentieth century and in recent decades his work has begun to play a prominent role in literary studies particularly in debates over language interpretation and critical judgment. Wittgenstein and Literary Studies solidifies this critical movement assembling recent critics and philosophers who understand Wittgenstein as a counterweight to longstanding tendencies in both literary studies and philosophical aesthetics. The essays here cover a wide range of topics: Why have contemporary writers been so drawn to Wittgenstein? What is a Wittgensteinian response to New Historicism Post Critique and other major critical movements? How does Wittgenstein help us understand the nature of style fiction poetry and the link between ethics and aesthetics? As the volume makes clear Wittgenstein's work provides a rare bridge between professional philosophy and literary studies offering us a way out of entrenched positions and their denials what Wittgenstein himself called pictures that held us captive.
