Lost Wine:

Napa Wine Charles L. Sullivan, 2008-10-01 Charles Sullivan's *Napa Wine A History* is the engaging story of the rise to prominence of what many believe to be the greatest winegrowing area in the Western hemisphere. This new edition completes that picture bringing to light more than a decade of dramatic changes and shifted norms visited upon the valley from phylloxera-wasted vineyards to High Court officiated territorial battles told in a rousing transportive narrative. Beginning in 1817 with the movement of Spanish missions into the San Francisco Bay area, Sullivan winds his way through the great wine boom of the late 19th century, the crippling effect of Prohibition, and Napa's rise out of its havoc to its eventual rivaling of Bordeaux in the judgments of 1976 and 2006. Published in cooperation with the Napa Valley Wine Library, the book includes historic maps, charts of vineyard ownership, and vintages from the 1880s to present. Concepts in Wine Technology, Small Winery Operations, Third Edition Yair Margalit, PhD, 2012-11 Following up on his bestselling *Winery Technology and Operations*, physical chemist and winemaker Yair Margalit comes out with the successive *Concepts in Wine Technology*, fully updated and revised to meet the advances of modern winemaking. Among the extended topics are fermentation, skin contact, acid balance, phenolics, bottling, the use of oak, and quality control. He begins in the vineyard, discussing proper maturation, soil, and climate, bunch health, vineyard disease states, and grape varieties. Next, he tackles the preharvest with a careful look at vineyard management and preparing the winery for harvest. Dr. Margalit then outlines the entire process of harvesting, from destemming, crushing, and skin contact as it applies to both red and white grapes, to pressing, must correction, and temperature control. Fermentation is examined fully and includes a lengthy look at the factors affecting malolactic fermentation and its pros and cons. There is a chapter on cellar operations that deals with racking, stabilization, fining, filtration, blending, and maintaining winery hardware, followed by sections on barreling and bottling. The final chapter pulls together the more general aspects of wine technology, covering sulphur dioxides, different forms of wine spoilage, and ways to ward them off, legal regulations, and one of the most important and enigmatic compounds in wine, phenolics. **Discovering Germany** Maureen Mahan Copelof, 2012-01-20 Maureen Mahan Copelof and her husband, Sylvan, fell in love with Germany while stationed there with the US military. Refusing to let the adventure end with their military tour, they embarked on a journey to purchase a home in a small German town on the Neckar River, well outside the usual haunts of American tourists. Here, they share their discoveries of unexpected treasures with the people they got to know: the beer, wine, and food that they experienced, and the history, art, castles, and fables that came alive for them.
