In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions Dr Hooman Koliji,2015-07-28 This book argues that design drawings should be recognised as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes e g form proportion colour highly evocative yet with no matter Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act It also adds to debates on philosophies of the imagination linking both Western and Islamic traditions *Citizenship in the Western Tradition* Peter Riesenberg,2000-11-09 Intended for both general readers and students Peter Riesenberg s instructive book surveys Western ideas of citizenship from Greek antiquity to the French Revolution It is striking to observe the persistence of important civic ideals and institutions over a period of 2 500 years and to learn how those ideals and institutions traveled over space and time from the ancient Mediterranean to early modern France England and America The Western Medical Tradition Lawrence I. Conrad,1995-08-17 This text written by members of the Wellcome Institute for the History of Medicine and first published in 1995 is designed to cover the history of western medicine from classical antiquity to 1800 As one guiding thread it takes as its title suggests the system of medical ideas that in large part went back to the Greeks of the eighth century BC and played a major role in the understanding and treatment of health and disease Its influence spread from the Aegean basin to the rest of the Mediterranean region to Europe and then to European settlements overseas By the nineteenth century however this tradition no longer carried the same force or occupied so central a position within medicine This book charts the influence of this tradition examining it in its social and historical context It is essential reading as a synthesis for all students of the history of medicine **Religion and Violence in Western Traditions** André Gagné,Jennifer Guyver,Gerbern S. Oegema,2021-09-16 This book examines the connection between religion and violence in the Western traditions of the three Abrahamic faiths from ancient to modern times It addresses a gap in the scholarly debate on the nature of religious violence by bringing scholars that specialize in pre

modern religions and scriptural traditions into the same sphere of discussion as those specializing in contemporary manifestations of religious violence Moving beyond the question of the authenticity of religious violence this book brings together scholars from a variety of disciplines Contributors explore the central role that religious texts have played in encouraging as well as confronting violence The interdisciplinary conversation that takes place challenges assumptions that religious violence is a modern problem that can be fully understood without reference to religious scriptures beliefs or history Each chapter focuses its analysis on a particular case study from a distinct historical period Taken as a whole these chapters attest to the persistent relationship between religion and violence that links the ancient and contemporary worlds This is a dynamic collection of explorations into how religion and violence intersect As such it will be a key resource for any scholar of Religious Studies Theology and Religion and Violence as well as Christian Jewish and Islamic Studies

Non-Western Educational Traditions Timothy Reagan, 2017-07-06 Indigenous Knowledge Systems Concluding Reflections Questions for Reflection and Discussion Author Index Subject Index Western Political Thought in Dialogue with Asia Cary J. Nederman, Takashi Shogimen, 2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West historians of political thought must incorporate Asian political discourse and ideas into their understanding By engaging in comparative studies this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought **The Tradition of Western Music** Gerald Abraham, 2022-05-13 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1974 Western Historical Thinking Jörn Rüsen, 2002 Presents 17 contributions written by an international group of historians addressing the intercultural dimension of historical theory The editor s introduction discusses historical thinking as intercultural discourse and presents ten hypotheses that aim to define Western historical thinking Scholars from Asia and Africa comment on his position in light of their own ideas about the sense and meaning of historical thinking The volume wraps up with comments on the questions and issues raised by the authors and suggestions for the future of intercultural communication Annotation copyrighted by Book News Inc Portland OR **A Social History of Western Political Thought** Ellen Meiksins

Wood, 2022-08-30 A sweeping and nuanced materialist history of Western political thought In this groundbreaking work Ellen Meiksins Wood rewrites the history of political theory from Plato to Rousseau Treating canonical thinkers as passionately engaged human beings Wood examines their ideas not simply in the context of political languages but as creative responses to the social relations and conflicts of their time and place She identifies a distinctive relation between property and state in Western history and shows how the canon while largely the work of members or clients of dominant classes was shaped by complex interactions among proprietors labourers and states Western political theory Wood argues owes much of its vigour and also many ambiguities to these complex and often contradictory relations In the first volume she traces the development of the Western tradition from classical antiquity through to the Middle Ages in the perspective of social history a significant departure not only from the standard abstract history of ideas but also from other contextual methods From the Ancient Greek polis of Plato Aristotle Aeschylus and Sophocles through the Roman Republic of Cicero and the Empire of St Paul and St Augustine to the medieval world of Averroes Thomas Aquinas and William of Ockham Wood offers a rich dynamic exploration of thinkers and ideas that have indelibly stamped our modern world In the second volume Wood addresses the formation of the modern state the rise of capitalism the Renaissance and Reformation the scientific revolution and the Age of Enlightenment which have all been attributed to the early modern period Nearly everything about its history remains controversial but one thing is certain it left a rich and provocative legacy of political ideas unmatched in Western history The concepts of liberty equality property human rights and revolution born in those turbulent centuries continue to shape and to limit political discourse today Assessing the work and background of figures such as Machiavelli Luther Calvin Spinoza the Levellers Hobbes Locke and Rousseau Ellen Wood vividly explores the ideas of the canonical thinkers not as philosophical abstractions but as passionately engaged responses to the social conflicts of their day

Non-Western Educational Traditions Timothy G. Reagan, 2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest

in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed

Methodologies of Comparative Philosophy Robert W. Smid, 2010-07-02 What is comparative philosophy This question is ultimately a methodological one according to this much needed book The cultivation of area studies in diverse traditions has opened up opportunities for cross cultural understanding that have rarely existed before and comparative philosophy is a rapidly emerging area of inquiry Yet surprisingly little has been written on comparative methodology in philosophy Of course there is much at stake in how we compare things how comparison is done determines what comparison is Author Robert W Smid provides a critical review of four of the most influential comparative methodologies within the American pragmatist and process philosophical traditions those of William Ernest Hocking F S C Northrop Robert Cummings Neville and David L Hall in collaboration with Roger T Ames Discussing the history of each methodology s development and critically assessing its strengths and weaknesses Smid demonstrates that it is possible to compare methods as well as traditions and encourages those interested to join the contemporary conversation

Marriage in the Western Church Philip Lyndon Reynolds, 2001 Author Philip Reynolds examines how marriage acquired a specifically Christian identity in the Latin West during the first millennium after Christ Beginning with Jesus everything the Christians did including getting married began a process of differentiation Reynolds offers three themes for theological reflection and interpretation Jesus teaching Paul s Letter to the Ephesians and Paul s justification of marriage as a solution to the problem of sexual desire Reynolds insights into the Christianization of marriage make this a valuable book at both the scholarly and the practical level
