*Successful Global Account Management* Kevin Wilson, Nick Speare, Samuel J. Reese, 2002 Based on a major global research study into Global Account Management GAM *Successful Global Account Management* shows companies how to adopt a radically different approach to dealing with their key accounts to operate as truly global suppliers

*Managing Cultural Diversity* Martin Baumüller, 2007 The effects of globalization require that multinational corporations MNCs coordinate their differentiated but interdependent organizational parts and align them to a common purpose This book examines the mechanisms that such organizations use to govern their global subsidiary networks The book starts with a review of key concepts and theories of multinational organizations and explains the rationale for their existence Based on this assessment and an empirical study of three globally operating entities the author develops a framework for examining the cultural and structural governance mechanisms that multinational corporations may employ to coordinate their global operations This framework identifies different configurations of cultural and structural governance mechanisms and explains what kind of configuration a multinational

organization should employ to ensure efficient governance      *International Politics* G Berridge, 2014-01-21 A new Edition of this well established introduction to international politics As with the previous two editions the book's emphasis is on states the conflicts that divide them the instruments they employ to pursue their ideals and secure their interests and the systems of precepts and practices through which conflicts are worked out      Putting the restructuring process of a company into practice Sven Dinklage, 1997-05-27 Inhaltsangabe Abstract Companies in today's business world are under a constant pressure they have to get as close as possible to the customer they have to become ever more flexible and they need to reduce costs In order to face these challenges some organisational structures are more likely to promise success than others The characteristics of these structures are no secret but companies often have the problem that they don't know how to put them into practice The present work is intended to give an answer to this question Having analysed what had been written about putting organisational change into practice I tested my ideas by a series of ten interviews which took place in companies of the German production sector Six points were identified as essential 1 The problem and the objectives of the project should be clear for all participants 2 The company should dispose of enough time and financial resources as well as a trusting working climate and a supportive top and middle management 3 Borderless communication is necessary especially concerning the evolution of the change project and the personal consequences for each person 4 The employees should be able to participate actively in elaborating the change project in decision making and in identifying possibilities to stimulate motivation This participation should be reflected in an adequate bonus system 5 Continuous training for all laying special attention on group leaders is important in such areas as group work communication and motivation The mentioned recommendations could be useful for the managers of companies which are thinking about a reorganisation That would enable them to avoid mistakes made by other companies The following mistakes were the most important ones Impatience and the expectation that there will be a magic solution it might take up to five years to reach the desired state The non-implication of the workforce in introducing the change process results the project is being blocked from their side Lack of communication which creates rumours about the coming change process results anxiety is created and the best workers will try to find another job Out of date bonuses which are not favourable in order to reach the company's global objectives such as individual bonuses and competition stimulators between groups Inhaltsverzeichnis Table of Contents FOREWORD5 EXECUTIVE      *Interdisciplinary Research* John Atkinson, Malcolm Crowe, 2006-11-02 An important book by researchers from across disciplines introducing varying ideas on research important in these days of interdisciplinary and multi-centered investigation The book introduces academics to new areas of endeavour and encourages researchers and students to think broadly when devising their studies Linking chapters present the contributions in an historical and theoretical context identifying the themes between the approaches and encourages new thinking about old problems Includes contributions from leading researchers across the quantitative qualitative spectrum from marine biology to spirituality With funding under

increasing pressure the different views will help departments form new alliances and encourage interdisciplinary working

**Extending the Eclectic Paradigm in International Business** H. Peter Gray, 2003 John Dunning is undoubtedly the world's leading scholar on the subject of multinational corporations and international business. This collection of original essays is designed to honor this work, particularly his achievements during his association with Rutgers University.

*Technology Transfer and Economic Growth in Sub-Saharan African Countries* Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets. The analytical model also provides an exhaustive analysis of all critical variables at the global, regional, and national levels which contribute to failure or success of technology transfer efforts. The model is validated by an incisive analysis of technology transfer experiences of Japan, Korea, Singapore, Taiwan, province of China, and Malaysia. While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer, the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries. This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals.
