*The Other Side* Qazi Nasir Uddin Ph.D.,2011-01-26 When one side is bright the other side must be dark To look at the other side we have to shed some light on the other side or better be there physically when the sun rises on the other side We can see pictures of the other side read books about it and talk to some people from that side to get some ideas about that side But none can be compared to going to the other side and staying there as long as it is necessary to know that side well

Grossman,2022-04-11 Privacy in human history is a relatively recent concept Nobody had much privacy in the Middle Ages Even kings and queens lacked privacy it was an age when crowds watched a queen give birth and the king received visitors while on the chamber pot Technology and concepts of privacy grew up together as both friends and enemies For example the late 19th century invention of the candid camera made it possible for the first time to take someone's picture without that person's consent This fact was in the background of the classic article by Warren and Brandeis that launched the right of privacy Today we have smart phones with cameras selfies the Internet surveillance cameras and tools that can look through walls smell through walls see through walls Dangers to privacy have multiplied enormously and we have only just begin figuring how to handle the change This book is timely as our basic understandings of privacy are challenged by modern technology changing social mores and evolving legal understandings that both reflect and reinforce underlying changes in society It is likely to be of interest to graduate and undergraduate students scholars and potentially other professionals with an interest in law and social norms *The American State Reports* Abraham Clark Freeman,1910
