inconsistencies and missing pieces Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer Understanding what the APIs do is essential for your job but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better faster and easier Learn how to spot when something that looks like a good solution to a problem really isn't Understand how the many standards that make up MHP fit together and implement them effectively and quickly Two DVB insiders teach you which elements of the standards that are needed for digital TV highlight those elements that are not needed and explain the special requirements that MHP places on implementations of these standards Once you've mastered the basics you will learn how to develop products for US European and Asian markets saving time and money By detailing how a team can develop products for both the OCAP and MHP markets Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical related standards Does the team developing a receiver have all the knowledge they need to succeed or have they missed important information in an apparently unrelated standard Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully or will their project fail Increase your chances of success the first time with Interactive TV Standards
