Naming The Enemy Anticorporate Social Movements Confront Globalization:

Naming the Enemy Amory Starr, 2000-10-27 The events around the WTO conference in Seattle focused attention on the rise of social movements opposing globalisation and the power of corporations This work is the first systematic analysis of these diverse at present uncoordinated movements They are a new phenomenon that has as yet received scant media or scholarly attention But it is likely to assume much greater political prominence as the globalised economy dominated by giant corporations fails to deliver on jobs social justice development and the environment The dialectic between public opposition and the corporate sector's response is likely to shape how our economic institutions will change in the coming years

Naming the Enemy Amory Starr, 2000 Naming the Enemy is the first systematic documentation of this international resistance to transnational corporations and globalization that has so recently burst into the public gaze with the street protests in Seattle Washington London and Prague Th Globalization, Social Movements, and the New Internationalism Peter Waterman, 2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems **The SAGE Handbook of Globalization** Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned

Post-Anarchism Duane Rousselle, Süreyya Evren, 2011-02-04 Post anarchism has been of considerable importance in the discussions of radical intellectuals across the globe in the last decade In its most popular form it demonstrates a desire to blend the most promising aspects of traditional anarchist theory with developments in post structuralist and post modernist thought *Post Anarchism A Reader* includes the most comprehensive collection of essays about this emergent body of thought making it an essential and accessible resource for academics intellectuals activists and anarchists interested in radical philosophy Many of the chapters have been formative to the development of a distinctly post anarchist approach to politics aesthetics and philosophy Others respond to the so called post anarchist turn with caution and scepticism The book also includes original contributions from several of today's post anarchists inviting further debate and new ways of conceiving post anarchism across a number of disciplines

The last decades have witnessed a steady increase in popular discontent with prevailing neoliberal approaches to economy policy and society And yet neoliberalism remains dominant even in the context of the ongoing financial crisis The anti neoliberal movement seems disorientated Typical explanations of this current contradictory situation highlight that anti neoliberal movements are unwilling to commit to a policy programme enact effective political tactics or challenge state institutions This book argues that a more deep seated problem lies at the heart of these deficiencies how the movement approaches the role of ideology in political action Reflecting a widely held belief that ours is a post ideological age ideology has been marginalized or altogether rejected by the majority of the movement s activists and intellectuals The dismissal of ideology has hindered the politics of resistance and it now becomes clear that a firm ideological vision is what activists urgently require to defy neoliberal domination This book shows the useful nature of ideology by exploring continuities between current anti neoliberal positions and well known past ideological arguments that changed the world *The Oxford Handbook of Comparative Politics* Carles Boix, Susan Carol Stokes, 2007 The Oxford Handbooks of Political Science is a ten volume set of reference books offering authoritative and engaging critical overviews of the state of political science Each volume focuses on a particular part of the discipline with volumes on Public Policy Political Theory Political Economy Contextual Political Analysis Comparative Politics International Relations Law and Politics Political Behavior Political Institutions and Political Methodology The project as a whole is under the General Editorship of Robert E Goodin with each volume being edited by a distinguished international group of specialists in their respective fields The books set out not just to report on the discipline but to shape it The series will be an indispensable point of reference for anyone working in political science and adjacent disciplines The Oxford Handbook of Comparative Politics offers a critical survey of the field of empirical political science through the collection of a set of chapters written by 47 top scholars in the discipline of comparative politics Part I includes chapters surveying the key research methodologies employed in comparative politics the comparative method the use of history the practice and status of case study research the contributions of field research and assessing the possibility of constructing a science of comparative politics Parts II to IV examine the foundations of political order the origins of states and the extent to which they relate to war and to economic development the sources of compliance or political obligation among citizens democratic transitions the role of civic culture authoritarianism revolutions civil wars and contentious politics Parts V and VI explore the mobilization representation and coordination of political demands Part V considers why parties emerge the forms they take and the ways in which voters choose parties It then includes chapters on collective action social movements and political participation Part VI opens up with essays on the mechanisms through which political demands are aggregated and coordinated This sets the agenda to the systematic exploration of the workings and
