Naming Nature:

Naming Nature Carol Kaesuk Yoon, 2009 Finalist for the 2009 Los Angeles Times Book Prize in Science and Technology the surprising untold story about the poetic and deeply human cognitive capacity to name the natural world Nature Knowledge Glauco Sanga, Gherardo Ortalli, 2004-11 Numerous scholars in particular anthropologists historians economists linguists and biologists have over the last few years studied forms of knowledge and use of nature and of the ways nature can be protected and conserved Some of the most prominent scholars have come together in this volume to reflect on what has been achieved so far to compare the work carried out in the past to discuss the problems that have emerged from different research projects and to map out the way forward *Great Lakes Nature* Mary Blocksma, 2004 One day I was gazing out my window at a stretch of trees when I was suddenly struck with the realization that I couldn't name any of them like most Americans I had somehow become an adult who could not claim even an elementary knowledge of my natural neighborhood Thus begins Mary Blocksma's ambitious quest to identify the flora and fauna of her Great Lakes home With no big program no particular organization Blocksma sets out to identify her environment just a name at a time a few times a week for a year Covering everything from blue moons and bald eagles to arbor vitae and lake effect snow this book transports the armchair explorer out of the living room and into the forests and wetlands of the Great Lakes In this charming guide to the everyday but often overlooked ecological treasures that await the would be naturalist you'll find not just the names of plants and animals but tips on buying bird feeders identifying spiders and telling a blue jay from a belted kingfisher Packed with helpful hints novel trivia and a useful guide to guidebooks *Great Lakes Nature* is sure to delight and educate **BOOK JACKET**

A Poetics of Jesus Jeffrey F. Keuss, 2018-10-24 This title was first published in 2002 *A Poetics of Jesus* explores the act of writing within and between the boundaries of 19th century biblical criticism and fiction Reflecting on the work of Christian poetics after Augustine to Baur Feuerbach Friedrich Strauss and Victorian novelists of the eighteenth and nineteenth century this book breaks new ground in juxtaposing the evoked image of Christ arising from Victorian biblical criticism against the image of Christ within fiction letting both these images and the words that figured them interact This book offers a highly accessible introduction to 19th century literature and theology through comparisons made to contemporary post modern theorists Demonstrating how literature can inform theology without itself becoming theology this book constitutes an important contribution to the literature theology debate and a much needed contribution to contemporary Christology through its introduction to the literature and the writers central to the beginnings of the historical quest for Jesus

The Story of Nature Jeremy Mynott, 2024-09-10 The story of humanity's evolving relationship with the natural world from pre history to the present day Nature has long been the source of human curiosity and wonderment and the inspiration for some of our deepest creative impulses But we are now witnessing its rapid impoverishment even destruction in much of our world In this beautifully illustrated book Jeremy Mynott traces the story of nature past present and future From the dramatic

depictions of animals by the prehistoric cave painters through the romantic discovery of landscape in the eighteenth century to the climate emergency of the present day Mynott looks at the different ways in which humankind has understood the world around it Charting how our ideas about nature emerged and changed over time he reveals how the impulse to control nature has deep historical roots As we reach an environmental crisis point this vital study shows how human imagination and wonder can play a restorative role and reveal what nature ultimately means to us

The Bounds of Myth Gustavo Esparza, Nassim Bravo, 2021-03-22 The articles in *The Bounds of Myth* edited by Gustavo Esparza and Nassim Bravo shed light on the internal shapes of the mythological discourse showing the way in which myth borders religion science literature theology i e other forms of rationality The contributing authors of the volume claim that myth is a valid form of thought and that the former evolves within other forms of discourse even though its composition is independent and even precedes the latter The articles collected here demonstrate the importance of myth as a form of thought that is in constant development a feature that shows in turn that in spite of its remote and archaic origin myth remains a valuable and relevant tool to interpret our own culture Contributors are Nassim Bravo Claudio Calabrese Teresa Enr quez Gustavo Esparza Ethel Junco Enrique Mart nez Cecilia Sabido and Jon Stewart

The Nature of All Being Raymond Bradley, 1992 In this comprehensive study of Wittgenstein s modal theorizing Bradley offers a radical reinterpretation of Wittgenstein s early thought and presents both an interpretive and a philosophical thesis A unique feature of Bradley s analysis is his reliance on Wittgenstein s Notebooks which he believes offer indispensable guidance to the interpretation of difficult passages in the *Tractatus* Bradley then goes on to argue that Wittgenstein s account of modality and the related notion of possible worlds is in fact superior to any of the currently popular theories in this area In this context he examines and critiques the work of such figures as Adams Carnap Hintikka Lewis Rescher and Stalnaker

Walter Benjamin and the Idea of Natural History Eli Friedlander, 2024-01-16 In this incisive new work Eli Friedlander demonstrates that Walter Benjamin s entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human beings belong to nature Across seemingly heterogeneous writings Friedlander argues Benjamin consistently explores what the natural in the human comes to that is how nature is transformed actualized redeemed and overcome in human existence The book progresses gradually from Benjamin s philosophically fundamental writings on language and nature to his Goethean empiricism from the presentation of ideas to the primal history of the Paris arcades Friedlander s careful analysis brings out how the idea of natural history inflects Benjamin s conception of the work of art and its critique his diagnosis of the mythical violence of the legal order his account of the body and of action of material culture and technology as well as his unique vision of historical materialism Featuring revelatory new readings of Benjamin s major works that differ sometimes dramatically from prevailing interpretations this book reveals the internal coherence and philosophical force of Benjamin s

thought **The Nature of the Chemical Concept** Keith S Taber,2022-06-29 This book offers a step by step analysis and discussion of just why some students find chemistry difficult by examining the nature of chemistry concepts and how they are communicated and learnt *Mapping Nature across the Americas* Kathleen A. Brosnan,James R. Akerman,2021-10-19 Maps are inherently unnatural Projecting three dimensional realities onto two dimensional surfaces they are abstractions that capture someone s idea of what matters within a particular place they require selections and omissions These very characteristics however give maps their importance for understanding how humans have interacted with the natural world and give historical maps especially the power to provide rich insights into the relationship between humans and nature over time That is just what is achieved in Mapping Nature across the Americas Illustrated throughout the essays in this book argue for greater analysis of historical maps in the field of environmental history and for greater attention within the field of the history of cartography to the cultural constructions of nature contained within maps This volume thus provides the first in depth and interdisciplinary investigation of the relationship between maps and environmental knowledge in the Americas including for example stories of indigenous cartography in Mexico the allegorical presence of palm trees in maps of Argentina the systemic mapping of US forests and the scientific platting of Canada s remote lands **Nature of the Chemical Concept** Keith S Taber,2019-04-29 The features of chemistry that make it such a fascinating and engaging subject to teach also contribute to it being a challenging subject for many learners Chemistry draws upon a wide range of abstract concepts which are embedded in a large body of theoretical knowledge As a science chemistry offers ideas that are the products of scientists creative imaginations and yet which are motivated and constrained by observations of natural phenomena Chemistry is often discussed and taught largely in terms of non observable theoretical entities such as molecules and electrons and orbitals which probably seem as familiar and real to a chemistry teacher as Bunsen burners and yet comprise a realm as alien and strange to many students as some learners own alternative conceptions misconceptions may appear to the teacher All chemistry teachers know that chemistry is a conceptual subject especially at the upper end of secondary school and at university level and that some students struggle to understand many chemical ideas This book offers a step by step analysis and discussion of just why some students find chemistry difficult by examining the nature of chemistry concepts and how they are communicated and learnt The book considers the idea of concepts itself draws upon case studies of how canonical chemical concepts have developed explores how chemical concepts become represented in curriculum and in classroom teaching and discusses how conceptual learning and development occurs This book will be invaluable to anyone interested in teaching and learning and offers guidance to teachers looking to make sense of and respond to the challenges of teaching chemistry The Hidden Half of Nature: The Microbial Roots of Life and Health David R. Montgomery,Anne Biklé,2015-11-16 Sure to become a game changing guide to the future of good food and healthy landscapes Dan Barber chef and author of The Third Plate Prepare to set aside what you think you know about yourself and microbes The Hidden Half of

Nature reveals why good health for people and for plants depends on Earth's smallest creatures Restoring life to their barren yard and recovering from a health crisis David R Montgomery and Anne Bikl discover astounding parallels between the botanical world and our own bodies From garden to gut they show why cultivating beneficial microbiomes holds the key to transforming agriculture and medicine *Abjection and Abandonment* Saitya Brata Das,2020-02-19 This book provides a thorough and insightful examination of melancholy in philosophy and art Since the advent of philosophy the question of melancholy has been intimately connected with creativity In addition melancholy has taken on a new importance in contemporary discourses Accordingly this book revisits the fascinating question of how melancholy and creativity are linked in light of contemporary thought and gathers studies from diverse disciplines such as aesthetic theories psychoanalysis cultural theory medical studies and sociological studies All the contributions are trans disciplinary in nature and will broaden readers understanding of various issues stemming from the question of melancholy This book will be an indispensable read for scholars researchers and practitioners in psychology psychoanalysis philosophy and related fields **Keepers of the Children** Laura M. Ramirez,2004 Keepers of the Children subtitle Native American Wisdom and Parenting uses little known Native American secrets to teach parents how to raise children who know their nature and use their strengths to create lives of meaning and contribution By raising children to unfold the uniqueness in their hearts parents touch the depths of their own By teaching children the secrets of genuine fulfillment they grow up to lead purposeful lives and cherish their parents for this gift Keepers of the Children is the first in a trilogy of parenting books **The Power to Name** H.A. Olson,2013-12-01 In this preface I will include explanations of three factors the intended audience of this book the structure of the book and the acknowledgement of many who contributed to its fruition The Power to Name is intended for two audiences those interested in knowledge organization and those interested in theoretical study of representation These two groups come from the perspective of the structure and principles of organization and from the perspective of understanding the cultural ramifications of naming The first may be those who develop subject representation schemes for a wide range of purposes and those who apply those schemes They may be librarians information scientists web developers or knowledge managers The second group are likely to be feminist poststructural and postcolonial theorists who explore the construction of meaning It is my hope that both of these audiences will find the case of subject representation in library catalogues illuminating in a much wider sense I have tried to include a modicum of explanation for each audience while avoiding over explanation for either This approach will require some patience and some close reading from each The intellectual structure of the book is introduced in the first chapter However in a book on organization of knowledge and information it is important to also explain its internal syndetic structure I have used some somewhat unconventional approaches The book contains a fair number of manual hyperlinks references to earlier discussions of a topic in the form of see also page referrals *Early American Nature Writers* Daniel Patterson,2007-11-30 At a time when the environment is of growing concern to students and

general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer s life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers

Postcolonial Ecologies Elizabeth DeLoughrey, George B. Handley, 2011-04-20 The first edited collection to bring ecocritical studies into a necessary dialogue with postcolonial literature this volume offers rich and suggestive ways to explore the relationship between humans and nature around the globe drawing from texts from Africa and the Caribbean as well as the Pacific Islands and South Asia Turning to contemporary works by both well and little known postcolonial writers the diverse contributions highlight the literary imagination as crucial to representing what Eduoard Glissant calls the aesthetics of the earth The essays are organized around a group of thematic concerns that engage culture and cultivation arboriculture and deforestation the lives of animals and the relationship between the military and the tourist industry With chapters that address works by J M Coetzee Kiran Desai Derek Walcott Alejo Carpentier Zakes Mda and many others Postcolonial Ecologies makes a remarkable contribution to rethinking the role of the humanities in addressing global environmental issues

James Bond and Philosophy James B. South, Jacob M. Held, 2012-03-30 Bond James Bond Since Sean Connery first uttered that iconic phrase in Dr No more than one quarter of the world s population has seen a 007 film Witty and urbane Bond seduces and kills with equal ease often it seems with equal enthusiasm This enthusiasm coupled with his freedom to do what is forbidden to everyone else evokes fascinating philosophical questions Here 15 witty thought provoking essays discuss hidden issues in Bond s world from his carnal pleasures to his license to kill Among the lively topics explored are Bond s relation to existentialism including his graduation beyond good and evil his objectification of women the paradox of breaking the law in order to ultimately uphold it like any stupid policeman the personality of 007 in terms of Plato s moral psychology and the Hegelian quest for recognition evinced by Bond villains A reference guide to all the Bond movies rounds out the book s many pleasures
