Naming Society Regional Identity:

Naming, Society and Regional Identity David Postles, 2002 The processes and patterns of naming form an important social aspect of many cultures and are particularly relevant to the nature of local and regional identity The ten papers in this volume derive from a symposium held in Leicester in 1990 and focus on issues of naming and social theory The volume draws together a wide variety of scholars interested in the development of personal naming including social historians local historians historical geographers demographers not to mention anthroponymists and social anthropologists The papers look at evidence from colonial North America Viking and Middle English naming the early modern period in England and 19th century Sweden Contributors Gabriel Lasker Malcolm Smith Roger Thompson Daniel Scott Smith Cecily Clark Gillian Fellows Jensen Jeremy Boulton Evelyn Lord Kevin Scher John Langton and Goran Hoppe

The Oxford Handbook of Names and Naming Carole Hough, 2016-05-03 In this handbook scholars from around the world offer an up to date account of the state of the art in different areas of onomastics in a format that is both useful to specialists in related fields and accessible to the general reader Since Ancient Greece names have been regarded as central to the study of language and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought The investigation of name origins is more recent as is the study of names in literature Relatively new is the study of names in society which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades The structure of this volume reflects the emergence of the main branches of name studies in roughly chronological order The first Part focuses on name theory and outlines key issues about the role of names in language focusing on grammar meaning and discourse Parts II and III deal with the study of place names and personal names respectively while Part IV outlines contrasting approaches to the study of names in literature with case studies from different languages and time periods Part V explores the field of socio onomastics with chapters relating to the names of people places and commercial products Part VI then examines the interdisciplinary nature of name studies before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals and explains the naming strategies adopted for them

Historical Perspectives on Social Identities Alyson Brown, 2009-01-14 This collection of work on the theme of identities was the result of a conference held in the spring of 2005 at Edge Hill under the auspices of The Centre for Liverpool and Merseyside Studies Whilst a significant proportion of the research focused on Liverpool and the North West the theme of identities was sufficiently broad to entice scholars from diverse and varied fields This collection therefore reflects the range of work presented and discussed at the conference and

the multi layered and multi faceted nature of identity Contributors to this edited collection examined the concept of identity in Britain through a range of historical perspectives concerning themselves primarily with the later modern period They reflect the extent to which nineteenth and twentieth century British social cultural and political change has given rise to pluralist fragmented and fractured identities and highlight the extent to which class gender religious and institutional frameworks have shifted continually This publication will therefore be of interest to those working in diverse fields but who share an interest in the importance of identity as a decisive cultural social economic and political determinant Questions of identity have centred a good deal of debate in the social sciences especially since the reception of Foucault's work in the English speaking world in the last couple of decades This has often taken a theoretical form Attempts to link theory with analytical practice have been strongest in the field that might be characterised as the politics of identity At any rate this has provided an important instance of theoretical and practical conflict Here the focus of the debate has been around questions of gender nation language economy security and race It has tried to clarify crucial divisions in the analysis of identity as between explanatory and constitutive models and between positivist and post positivist procedures For the most part these intense and extensive concerns have passed by largely unnoticed among historians practising in Britain in the well found but conventional idioms of political and social history What this conference volume seeks to do is to help redress the deficit to domesticate some of the theoretical and polemical exchanges around identity into a world of practical yet conceptually aware historical work This is a difficult but surely worthwhile task to broach various imaginaries of identity issues of identitarian politics and questions of identity formation on a series of relatively familiar historical contexts Of course no selection of subjects for practical research in this way can be exhaustive The group of essays offered here is sufficiently wide and occasionally gratifyingly unexpected at least to begin the job to stimulate others and most importantly to interject theoretical concern into historical fields sometimes lacking it Ten essays are included together with the editor's introduction The pieces are bound together by a common strategy not a shared empirical territory They range from studies of gendered identity formation to regional identities formed around seaside resorts to empirical questions of class and capitalism and their identitarian politics to historical analysis of mourning and on to language nationality deafness motherhood and their inflection in identity in past time This well edited combination of shared conceptual purpose and variety of empirical form seems to me to work well The book will be widely used in a variety of historical fields not least in those which have been the most resistant to recent theoretical innovations in the social sciences Keith Nield Editor SOCIAL HISTORY This is a fascinating and wide ranging collection of essays linked by the over riding theme of identity While primarily historical in their focus the essays will be of interest to more than just historians They raise a variety of interesting conceptual and theoretical issues from for instance the significance of the staymaker in the formation of eighteenth century female identity to the relationship between regional identity and late nineteenth and early twentieth century Lancashire seaside resorts Sam

Davies Professor of History School of Social Science Liverpool John Moores University *The Grammar of Names in Anglo-Saxon England* Fran Colman, 2014-07-24 This book examines personal names including given and acquired or nick names and how they were used in Anglo Saxon England It discusses their etymologies semantics and grammatical behaviour and considers their evolving place in Anglo Saxon history and culture From that culture survive thousands of names on coins in manuscripts on stone and other inscriptions Names are important and their absence a stigma Grendel's parents have no names they may have particular functions in ritual and magic they mark individuals generally people but also beings with close human contact such as dogs cats birds and horses and they may provide indications of rank and gender Dr Colman explores the place of names within the structure of Old English their derivation formation and other linguistic behaviour and compares them with the products of other Germanic e g Present day German and non Germanic e g Ancient and Present day Greek naming systems Old English personal names typically followed the Germanic system of elements based on common words like leof adjective beloved and wulf noun wolf which give Leofa and Wulf and often combined as in Wulfraed r d noun advice counsel or as in Leofing with the diminutive suffix ing The author looks at the combinatorial and sequencing possibilities of these elements in name formation and assesses the extent to which in origin names may be selected to express qualities manifested by or expected in an individual She examines their different modes of inflection and the variable behaviour of names classified as masculine or feminine The results of her wide ranging investigation are provocative and stimulating The Oxford Dictionary of Family Names in Britain and Ireland Patrick Hanks, Richard Coates, Peter McClure, 2016-11-17 Containing entries for more than 45 000 English Scottish Welsh Irish Cornish and immigrant surnames The Oxford Dictionary of Family Names in Britain and Ireland is the ultimate reference work on family names of the UK The Dictionary includes every surname that currently has more than 100 bearers Each entry contains lists of variant spellings of the name an explanation of its origins including the etymology lists of early bearers showing evidence for formation and continuity from the date of formation down to the 19th century geographical distribution and where relevant genealogical and bibliographical notes making this a fully comprehensive work on family names This authoritative guide also includes an introductory essay explaining the historical background formation and typology of surnames and a guide to surnames research and family history research Additional material also includes a list of published and unpublished lists of surnames from the Middle Ages to the present day **Words, Names, and History** Cecily Clark, 1995 Cecily Clark 1926 1992 is familiar to medievalists as editor of the Peterborough Chronicle others will know her work in Anglo Saxon Anglo Norman and Middle English studies in particular her extensive researches in medieval English onomastics She lectured at the universities of London Edinburgh and Aberdeen before settling in Cambridge as Research Fellow of successively Newnham College and Clare Hall She was past joint editor of *Nomina* a Council member of the English Place Name Society and a member of the International Committee of Onomastic Sciences **The Grammar of Names** John M. Anderson, 2007-01-04 This book is the

first systematic account of the syntax and semantics of names Drawing on work in onomastics philosophy and linguistics John Anderson examines the distribution and subcategorization of names within a framework of syntactic categories and considers how the morphosyntactic behaviour of names connects to their semantic roles He argues that names occur in two basic circumstances one involving vocatives and their use in naming predications where they are not definite the other their use as arguments of predicators where they are definite This division is discussed in relation to English French Greek and Seri and a range of other languages Professor Anderson reveals that the semantic status of names including prototypicality is crucial to understanding their morphosyntax and role in derivational relationships He shows that semantically coherent subsets of names such as those referring to people and places are characterized by morphosyntactic properties which may vary from language to language His original and important investigation will appeal to scholars and advanced students of linguistics and philosophy

Naming, Identity and Tourism Maoz Azaryahu, Luisa Caiazzo, Richard Coates, 2020-01-14 Names weave the texture of our daily lives in ways that are self evident However behind their taken for granted threads they conceal a considerable meaning potential that may turn them into malleable vehicles of human goals and agendas The novelty of this volume lies in the special focus it places on the intersections of naming identity and tourism pointing to how names may play a role in the multifaceted process of identity formation by shaping and promoting tourist attractions be they topographical or metaphorical locations The volume collects original contributions on this emerging field of enquiry that foster an eclectic approach to the study of names The thematic focus and the several approaches adopted here will make the text appealing to postgraduate students and researchers from several disciplinary fields ranging across onomastics linguistics cultural and social geography history archaeology heritage literature postcolonial studies and media studies

Migration, Mobility and Modernization David J. Siddle, 2000-01-01 For almost a hundred years the academic study of migration concentrated on evolving standardised models of migration behaviour based on data from censuses or the registration of births marriages and deaths More recently it has been realised that such models fail to take into account the decision making behind migration and that better understanding will come from study of the behaviour of individuals as well as aggregate numbers In this book the imaginative use of alternative sources DS for example apprentice books guild and craft records legal and court documents diaries and biographies DS gives fresh insights into the processes of movement to reveal much more complex circulatory behaviour than the standard models derived from census and registration sources alone have suggested The first chapter confronts the issue of rural mobility in post famine Ireland and is followed by a study centred on Alpine rural families which built impressive networks across pre industrial Western Europe Two chapters focus on the particular characteristics of worker groups mining families of south Lancashire during the period of rapid increase in coal production in the eighteenth century and the organised mobility of skilled labour in nineteenth century central Europe Next an imaginative and rigorous deployment of the techniques of family reconstruction and record linkage embracing a variety of sources vital event registers wills port books apprentice records teases out the migration histories of those who settled in eighteenth century Liverpool There are two chapters on female migrant behaviour drawing attention in the case of eighteenth century Rheims to the opportunities and restrictions on the life of migrant women at different points in their lifecycles and showing how poor women struggled to survive in nineteenth century Dublin The final chapter uses family histories assembled by numerous genealogists and family historians to challenge the orthodox view of direct stepwise migration from a smaller to a larger town in the urban hierarchy
