The Invisible Wounded Warriors in a Nation at Peace Jan Grimell, 2022-02-11 Although there has not been war in Swedish territory for many years this does not mean that the country has no veterans who have experienced the challenges of war zone deployments or suffer from combat trauma The Invisible Wounded Warriors in a Nation at Peace gives a rare look at the international operations of the Swedish military while offering the reader a unique and deeper understanding of life with PTSD The book uses terms such as moral injury to further describe the complexity Complex PTSD after deployment in a conflict zone is a uniquely complicated web of problems that can have medical psychological moral existential and spiritual dimensions The book discusses what this might mean from an identity and pastoral care perspective Jan Grimell is a postdoctoral researcher at the Department of Sociology at Uppsala University He has also conducted postdoctoral research in spiritual care at the Unit for Research and Analysis within the Church of Sweden He is affiliated with Linnaeus University and the Amsterdam Centre for the Study of Lived Religion at Vrije Universiteit

Tjänster och gentjänster Sophie Kinsella, 2019-07-01 Familjen gör förstås Det har Fixie Farris pappa lårt henne Och efter att han gick bort har Fixie gnat all tid till butiken han lämnade efter sig För Fixie säger inte nej det ligger inte i hennes natur När en stilig förmöling på ett kafé ber Fixie att passa hans dator en stund säger hon självklart ja Men när hon sedan lyckas radda den

undan en olycka blir datorns gäres tacksam att han skriver ner jag är skyldig dig en tjänst på en servett och räddar henne den tillsammans med sitt visitkort Till en bror som skämtar Fixie bort alltihop Hon skulle väl aldrig be en förmanande man om en tjänst Men med tiden bror Fixie och Sebastian hjälpa varandra på de mest oväntade ställen Tjänster och gentjänster Och kanske blir detta bror på ett ventyr för dessa två Sophie Kinsella är en av våra mest läskade underhållningsförfattare Sedan Printz Publishing gav ut hennes Mitt inte så perfekta liv 2017 har hennes bror sålt i över 100 000 exemplar i Sverige och Tjänster och gentjänster är lika tacksamt som skratta och gott roligt

Samlade skrifter: delen. Ur hävden och livet; historiska essayer och studier Ola Hansson, 1921 **Aseptic Loosening of Orthopedic Implants** Mehdi Amirhosseini, 2019-05-24 Aseptic loosening is the main cause of failure of orthopedic prostheses With no pharmaceuticals to prevent or mitigate periprosthetic bone degradation a surgery to replace the loose implant with a new one is the only choice to restore patients function Most studies on mechanisms for aseptic loosening investigate wear debris particle induced osteolysis However pathological loading conditions around unstable implants can also trigger osteoclast differentiation and bone loss In the first study global gene expression changes induced by mechanical instability of implants and by titanium particles were compared in a validated rat model for aseptic loosening Microarray analysis showed that similar signaling pathways and gene expression patterns are involved in particle and instability induced periprosthetic osteolysis with an early onset innate immune response as a hallmark of osteolysis induced by mechanical instability Further effects of potential therapeutics on restriction of excessive osteoclast differentiation were evaluated Wnt signaling pathway is known to regulate bone remodeling In the second study effects of inactivation of glycogen synthase kinase 3 beta GSK 3 a negative regulator of canonical Wnt signaling on instability induced periprosthetic osteolysis were examined using our rat model for aseptic loosening Inhibition of GSK 3 led to a decrease in osteoclast numbers in the periprosthetic bone tissue exposed to mechanical instability while osteoblast perimeter showed an increase This was accompanied by higher bone volume fraction BV TV in animals treated with the GSK 3 inhibitor In the third study potential beneficial effects of two selective inhibitors of cyclindependent kinase 8 19 CDK8 19 on bone tissue were evaluated CDK8 19 is a Mediator complex associated transcriptional regulator involved in several signaling pathways CDK8 19 inhibitors mainly under investigation as treatments for tumors are reported to enhance osteoblast differentiation and bone formation We show in this study for the first time that

inhibition of CDK8 19 led to marked suppression of osteoclast differentiation from bone marrow macrophages in vitro through disruption of the RANK signaling In mouse primary osteoblasts downregulation of osteopontin mRNA a negative regulator of mineralization together with increased alkaline phosphatase activity and calcium deposition indicated that osteoblast mineralization was promoted by CDK8 19 inhibition Moreover local administration of a CDK8 19 inhibitor promoted cancellous bone regeneration in a rat model for bone healing These studies contribute to better understanding of mechanisms behind mechanical instability induced periprosthetic osteolysis and propose potential therapeutics to restrict bone loss with effects on both osteoclasts and osteoblasts
