Nariokotome Homo Erectus Skeleton:

The Nariokotome Homo Erectus Skeleton Alan Walker, Richard E. Leakey, 1993 The discovery of the Nariokotome Homo erectus skeleton a milestone in the history of paleoanthropology is fully documented in this book Beautifully illustrated it takes us into the field and the laboratory and into the far reaches of prehistory to show us what the fossilized remains of a young boy can tell us about our beginnings Human Evolution Source Book Russell L. Ciochon, John G. Fleagle, 2016-12-05 For Junior Senior and Graduate courses in Human Evolution taught in anthropology and biology departments This book is the most comprehensive collection of cutting edge articles on human evolution Designed for use by students in anthropology paleontology and evolutionary biology this edited volume brings together the major ideas and publications on human evolution of the past three decades The book spans the entire scope of human evolution with particular emphasis on the fossil record including archaeological studies *Human Evolution* Camilo J. Cela-Conde, Francisco J. Ayala, 2007-09-27 Human Evolution provides a comprehensive overview of hominid evolution synthesising data and approaches from fields as diverse as physical anthropology evolutionary biology molecular biology genetics archaeology psychology and philosophy The book starts with chapters on evolution population genetics systematics and the methods for constructing evolutionary trees These are followed by a comprehensive review of the fossil history of human evolution since our divergence from the apes Subsequent chapters cover more recent data both fossil and molecular relating to the evolution of modern humans A final section describes the evolution of culture language art and morality The authors are leading experts in two complementary fields of scholarship physical anthropology and molecular evolution Throughout the book they successfully integrate their expertise in evolutionary theory phylogenetics genomics cultural evolution language aesthetics and morality to produce a cutting edge textbook copiously illustrated and with an extensive and up to date bibliography It will be suitable for both senior undergraduate and graduate level students taking courses on human evolution within departments of biology anthropology psychology and philosophy The book will also appeal to a more general audience seeking a readable up to date and inclusive treatment of human origins and evolution Processes in Human Evolution Francisco José Ayala, Camilo José Cela Conde, 2017 The discoveries of the last decade have brought about a completely revised understanding of human evolution due to the recent advances in genetics palaeontology ecology archaeology geography and climate science Written by two leading authorities in the fields of physical anthropology and molecular evolution Processes in Human Evolution presents a reconsidered overview of hominid evolution synthesising data and approaches from a range of inter disciplinary fields The authors pay particular attention to population migrations since these are crucial in understanding the origin and dispersion of the different genera and species in each continent and to the emergence of the lithic cultures and their impact on the evolution of cognitive capacities Processes in Human Evolution is intended as a primary textbook for university courses on human evolution and may also be used as supplementary reading in advanced undergraduate and graduate

courses It is also suitable for a more general audience seeking a readable but up to date and inclusive treatment of human origins and evolution

The Nariokotome Homo Erectus Skeleton Alan Walker, Richard Leakey, 1993 The partial skeleton of Homo erectus found in Kenya by Alan Walker Richard Leakey and others is truly one of the great discoveries in paleoanthropology after the world's best paleoanthropologists have diligently searched for traces of Homo erectus in Africa and Asia for a century In this book the authors present descriptions and photographs of all parts of the skeleton and accompany these with a thorough analysis It consists of three parts The first part covers the geology dating paleoenvironments and the taphonomy of the site The second part is a description of the specimen and a review of other Homo erectus specimens from the Lake Turkana region The last part is composed of analytical papers on certain aspects of the boy's biology as they apply to other Homo erectus specimens What impresses me most about the volume is that apart from the basic description of the fossil which itself is of great importance the editors have sought out leading experts to tackle problems relating to specific issues in the evolutionary biology of Homo erectus Many of these chapters would stand alone as major contributions Together they make a remarkable volume that will become a standard reference Robert A Foley Professor of Biological Anthropology University of Cambridge

Our Ancient Youth Robert C. Vannucci, Susan J. Vannucci, 2025-10-15 The major purpose of this monograph is to describe hominin fossils that are the juvenile representatives of the various species of our human ancestral past in the context of the disciplines of ontogeny and phylogeny Ontogeny is the study of development through the lifespan while phylogeny is the study of evolution The book is appropriate largely for upper level undergraduate and graduate students interested in the fields of developmental biology neuroscience and anthropology The treatise is also accessible to a non anthropological reader as it provides some background pertaining to evolutionary principles and chronology There are two major sections in the book The first section is related to those critical characteristics that define hominins and to general concepts of ontogeny and the second is related to the hominin lineage as a series of chronological events These successive evolutionary stages begin with the presumed earliest hominins and end with the appearance of anatomically modern humans AMH's within the past 200 000 years

Building Bones: Bone Formation and Development in Anthropology Christopher J. Percival, Joan T. Richtsmeier, 2017-02-23 In this volume studies of bone growth and development illustrate new methods and insights that enhance the anthropological understanding of skeletal variation

Out of Africa I John G. Fleagle, John J. Shea, Frederick E. Grine, Andrea L. Baden, Richard E. Leakey, 2010-08-20 For the first two thirds of our evolutionary history we hominins were restricted to Africa Dating from about two million years ago hominin fossils first appear in Eurasia This volume addresses many of the issues surrounding this initial hominin intercontinental dispersal Why did hominins first leave Africa in the early Pleistocene and not earlier What do we know about the adaptations of the hominins that dispersed their diet locomotor abilities cultural abilities Was there a single dispersal event or several Was the hominin dispersal part of a broader faunal expansion of African mammals

northward What route or routes did dispersing populations take

The Wisdom of the Bones Alan Walker, Pat Shipman, 1997-09-02 Fascinating As engaging an explanation of how scientists study fossil bones as any I have ever read John R Alden Philadelphia Inquirer In 1984 a team of paleoanthropologists on a dig in northern Kenya found something extraordinary a nearly complete skeleton of Homo erectus a creature that lived 1 5 million years ago and is widely thought to be the missing link between apes and humans The remains belonged to a tall rangy adolescent male The researchers called him Nariokotome boy In this immensely lively book Alan Walker one of the lead researchers and his wife and fellow scientist Pat Shipman tell the story of that epochal find and reveal what it tells us about our earliest ancestors We learn that Nariokotome boy was a highly social predator who walked upright but lacked the capacity for speech In leading us to these conclusions The Wisdom of the Bones also offers an engaging chronicle of the hundred year long search for a missing link a saga of folly heroic dedication and inspired science Brilliantly captures an intellectual odyssey One of the finest examples of a practicing scientist writing for a popular audience Portland Oregonian A vivid insider s perspective on the global efforts to document our own ancestry Richard E Leakey

Primate Craniofacial Function and Biology Chris Vinyard, Matthew J. Ravosa, Christine Wall, 2008-09-17 Primate Craniofacial Function and Biology is an integrative volume with broad coverage of current research on primate craniofacial biology and function Topic headings include the mammalian perspective on primate craniofacial form and function allometric and comparative morphological studies of primate heads in vivo research on primate mastication modeling of the primate masticatory apparatus primate dental form and function and palaeoanthropologic studies of primate skulls Additionally the volume includes introductory chapters discussing how primatologists study adaptations in primates and a discussion of in vivo approaches for studying primate performance At present there are no texts with a similar focus on primate craniofacial biology and no sources that approach this topic from such a wide range of research perspectives This breadth of research covered by leaders in their respective fields make this volume a unique and innovative contribution to biological anthropology

From Biped to Strider D. Jeffrey Meldrum, Charles E.

Hilton,2011-06-27 The inspiration for this volume of contributed papers stemmed from conversations between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed presented at the 1998 meetings of the American Association of Physical Anthropologists (AAPA). Earlier at those meetings Jeff Meldrum with Roshna Wunderlich had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility. As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking. From the continuation of that dialogue grew the proposal for a symposium which we called From Biped to Strider: the Emergence of Modern Human Walking. The symposium was held as a session of the 69th annual meeting of the AAPA held in San Antonio, Texas in 2000. It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit or retained a significant degree of arboreality.

Archaeology at the Millennium Gary M. Feinman, T. Douglas Price, 2007-09-27 In this book internationally distinguished contributors consider hot topics in turn of the millennium archaeology and chart an ambitious agenda for the future. *Wiley-Blackwell*

Encyclopedia of Human Evolution Bernard Wood, 2011-03-31 This comprehensive A to Z encyclopedia provides extensive coverage of important scientific terms related to improving our understanding of how we evolved. Specifically the 5,000 entries in this two volume set cover evidence and methods used to investigate the relationships among the living great apes, evidence about what makes the behavior of modern humans distinctive and evidence about the evolutionary history of that distinctiveness as well as information about modern methods used to trace the recent evolutionary history of modern human populations. This text provides a resource for everyone studying the emergence of *Homo sapiens*. Getting Here William White Howells, 1997 Three individuals left footprints in East Africa 3.7 million years ago. Walking upright on human feet they had crossed a threshold in the long path of their evolution from vertebrates, mammals and primates to enter and dominate a new world. They were not alone. Others related and descended in ways not entirely clear, spread out, flourished and disappeared, some became the people of today. Although we know a great deal of the story and new information is arriving ever more rapidly, there is still more to be learned about where, when and how our ancestors became us. We do know that we arrived not because we were inevitable but by luck and happenstance along the way. And we know there were other kinds of humans who co-existed with each other and who might be here today but are not. Now updated and revised to reflect the latest findings and their implications, renowned anthropologist, author and educator William Howells draws together here the latest from all today's sciences to tell the fascinating stories of our evolution.

The Cambridge World Prehistory Colin Renfrew, Paul Bahn, 2014-06-09 The Cambridge World Prehistory provides a systematic and authoritative examination of the prehistory of every region around the world from the early days of human origins in Africa two million years ago to the beginnings of written history which in some areas started only two centuries

ago Written by a team of leading international scholars the volumes include both traditional topics and cutting edge approaches such as archaeolinguistics and molecular genetics and examine the essential questions of human development around the world The volumes are organised geographically exploring the evolution of hominins and their expansion from Africa as well as the formation of states and development in each region of different technologies such as seafaring metallurgy and food production The Cambridge World Prehistory reveals a rich and complex history of the world It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic tradition region or period within prehistory

A Companion to Paleoanthropology David R. Begun, 2012-12-20 A Companion to Paleoanthropology presents a compendium of readings from leading scholars in the field that define our current knowledge of the major discoveries and developments in human origins and human evolution tracing the fossil record from primate and hominid origins to the dispersal of modern humans across the globe Represents an accessible state of the art summary of the entire field of paleoanthropology with an overview of hominid taxonomy Features articles on the key discoveries in ape and human evolution in cranial postcranial and brain evolution growth and development Surveys the breadth of the paleontological record from primate origins to modern humans Highlights the unique methods and techniques of paleoanthropology including dating and ecological methods and use of living primate data to reconstruct behavior in fossil apes and humans
