## **Narrative Comprehension A Discourse Perspective:**

**Narrative Comprehension** Catherine Emmott,1997 Despite the current explosion of interest in cognitive linguistics there has so far been relatively little research by cognitive linguists on narrative comprehension Emmott draws on insights from discourse analysis and artificial intelligence to present a detailed model of how readers build maintain and use mental representations of fictional contexts and how they keep track of characters and contexts within a complex changing fictional world The work has implications for linguistic theory since it questions several long held assumptions about anaphora arguing for a levels of consciousness model for the processing of referring expressions The book begins with a summary of current issues in text processing theory and a discussion of the methodological importance of recognizing the hierarchical structure of discourse The core of the book explores the significance of contextual monitoring in narrative comprehension and looks particularly at the cognitive demands placed on readers by flashbacks Later chapters examine the implications of contextual monitoring for reference theory and for a literary linguistic model of narrative text types The study focuses on anaphoric pronouns in narratives assessing the accumulated knowledge required for readers to interpret these key grammatical items

**Narrative Progression in the Short Story** Michael J. Toolan,2009 One of our most valuable capacities is our ability partly to predict what will come next in a text But linguistic understanding of this remains very limited especially in genres such as the short story where there is a staging of the clash between predictability and unpredictability This book proposes that a matrix of narrativity furthering textual features is crucial to the reader s forming of expectations about how a literary story will continue to its close Toolan uses corpus linguistic software and methods and stylistic and narratological theory in the course of delineating the matrix of eight parameters that he sees as crucial to creating narrative progression and expectation The book will be of interest to stylists narratologists corpus linguists and short story scholars

**Oral Poetics and Cognitive Science** Mihailo Antovic,Cristóbal Pagán Cánovas,2016-08-22 What can oral poetic traditions teach us about language and the human mind Oral Poetics has produced insights relevant not only for the study of traditional poetry but also for our general understanding of language and cognition formulaic style as a product of rehearsed improvisation the thematic structuring of traditional narratives or the poetic use of features from everyday speech among many others The cognitive

sciences have developed frameworks that are crucial for research on oral poetics such as construction grammar or conversation analysis The key for connecting the two disciplines is their common focus on usage and performance This collection of papers explores how some of the latest research on language and cognition can contribute to advances in oral studies At the same time it shows how research on verbal art in its natural oral medium can lead to new insights in semantics pragmatics or multimodal communication The ultimate goal is to pave the way towards a Cognitive Oral Poetics a new interdisciplinary field for the study of oral poetry as a window to the mind     **The Pragmatics of Personal Pronouns** Laure Gardelle,Sandrine Sorlin,2015-11-15 This volume presents new research on the pragmatics of personal pronouns Whereas personal pronouns used to have a reputation of poor substitutes for full NP s recent research shows that personal pronouns are a fundamental if not universal category whose pragmatics is central to their understanding For instance personal pronouns may indicate attentional continuity or social deixis and take on genre specific pragmatic effects The authors of the present collection investigate such effects and analyse competing forms in context e g she her in subject position as well as their pragmatic functions in an extensive range of genres such as advertising TV series charity appeals mother child interaction or computer mediated communication Moreover one section is devoted to the pragmatics of antecedentless pronouns and so called impersonal personal forms The volume will be of interest to both scholars and students interested in the pragmatics of functional words

**Cognitive Grammar in Contemporary Fiction** Chloe Harrison,2017-05-24 This book proposes an extension of Cognitive Grammar Langacker 1987 1991 2008 towards a cognitive discourse grammar through the unique environment that literary stylistic application offers Drawing upon contemporary research in cognitive stylistics Text World Theory deixis and mind modelling amongst others the volume scales up central Cognitive Grammar concepts such as construal grounding the reference point model and action chains in order to explore the attenuation of experience and how it is simulated in literary reading In particular it considers a range of contemporary texts by Neil Gaiman Jennifer Egan Jonathan Safran Foer Ian McEwan and Paul Auster This application builds upon previous work that adopts Cognitive Grammar for literary analysis and provides the first extended account of Cognitive Grammar in contemporary fiction

**Corpus Stylistics in Principles and Practice** Yufang Ho, 2011-03-17 In this book Yufang Ho compares the text style difference between the two versions of John Fowles The Magus exemplifying the methodological principles and analytic practices of the corpus stylistic approach The Magus was first published in 1966 and was revised and republished by Fowles in 1977 Fowles own comment on the second edition was that it was rather more than a stylistic revision The book explores how the revised version is linguistically different from the original especially in terms of point of view re representation The corpus stylistic approach adopted combines qualitative and quantitative comparison to confirm the overall text style difference The analysis demonstrates that computer assisted methods can identify significant linguistic features which literary critics have not noticed and provide a more detailed descriptive basis for literary interpretation of either edition of the novel This analysis of The Magus serves as a case study and exemplar of how corpus techniques may be used generally in the study of linguistics Routledge Encyclopedia of Narrative Theory David Herman, Manfred Jahn, Marie-Laure Ryan, 2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of

inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource

*The Storyworld Accord* Erin James,2015-07-01 Storyworlds mental models of context and environment within which characters function is a concept used to describe what happens in narrative Narratologists agree that the concept of storyworlds best captures the ecology of narrative interpretation by allowing a fuller appreciation of the organization of both space and time by recognizing reading as a process that encourages readers to compare the world of a text to other possible worlds and by highlighting the power of narrative to immerse readers in new and unfamiliar environments Focusing on the work of writers from Trinidad and Nigeria such as Sam Selvon and Ben Okri The Storyworld Accord investigates and compares the storyworlds of nonrealist and postmodern postcolonial texts to show how such narratives grapple with the often collapsed concerns of subjectivity representation and environment bringing together these narratological and ecocritical concerns via a mode that Erin James calls econarratology Arguing that postcolonial ecocriticism like ecocritical studies has tended to neglect imaginative representations of the environment in postcolonial literatures James suggests that readings of storyworlds in postcolonial texts helps narrative theorists and ecocritics better consider the ways in which culture ideologies and social and environmental issues are articulated in narrative forms and structures while also helping postcolonial scholars more fully consider the environment alongside issues of political subjectivity and sovereignty
