American Arabesque Jacob Rama Berman, 2012-06-11 Part of the American Literatures Initiative Series American Arabesque examines representations of Arabs Islam and the Near East in nineteenth century American culture arguing that these representations play a significant role in the development of American national identity over the century revealing largely unexplored exchanges between these two cultural traditions that will alter how we understand them today Moving from the period of America s engagement in the Barbary Wars through the Holy Land travel mania in the years of Jacksonian expansion and into the writings of romantics such as Edgar Allen Poe the book argues that not only were Arabs and Muslims prominently featured in nineteenth century literature but that the differences writers established between figures such as Moors Bedouins Turks and Orientals provide proof of the transnational scope of domestic racial politics Drawing on both English and Arabic language sources Berman contends that the fluidity and instability of the term Arab as it appears in captivity narratives travel narratives imaginative literature and ethnic literature simultaneously instantiate and undermine definitions of the American nation and American citizenship

Journeys of the Slave Narrative in the Early Americas Nicole N. Aljoe, Ian Finseth, 2014-11-14 Focusing on slave narratives from the Atlantic world of the eighteenth and early nineteenth centuries this interdisciplinary collection of essays suggests the importance even the necessity of looking beyond the iconic and ubiquitous works of Olaudah Equiano Frederick Douglass and Harriet Jacobs In granting sustained critical attention to writers such as Briton Hammon

Omar Ibn Said Juan Francisco Manzano Nat Turner and Venture Smith among others this book makes a crucial contribution not only to scholarship on the slave narrative but also to our understanding of early African American and Black Atlantic literature The essays explore the social and cultural contexts the aesthetic and rhetorical techniques and the political and ideological features of these noncanonical texts By concentrating on earlier slave narratives not only from the United States but from the Caribbean South America and Latin America as well the volume highlights the inherent transnationality of the genre illuminating its complex cultural origins and global circulation *Tennyson and the Fabrication of Englishness* M. Sherwood, 2013-03-05 Through an examination of Tennyson's domestic poetry his portrayals of England and the English in their changing nineteenth century context this book demonstrates that many of his representations were fabrications more idealized than real which played a vital part in the country's developing identity and sense of its place in the world

Women and English Piracy, 1540-1720 John C. Appleby, 2013 Piracy was one of the most gendered criminal activities during the early modern period As a form of maritime enterprise and organized criminality it attracted thousands of

male recruits whose venturing acquired a global dimension as piratical activity spread across the oceans and seas of the world. At the same time piracy affected the lives of women in varied ways. Adopting a fresh approach to the subject this study explores the relationships and contacts between women and pirates during a prolonged period of intense and shifting enterprise. Drawing on a wide body of evidence and based on English and Anglo American patterns of activity it argues that the support of female receivers and maintainers was vital to the persistence of piracy around the British Isles at least until the early seventeenth century. The emergence of long distance and globalized predation had far reaching consequences for female agency. Within colonial America women continued to play a role in networks of support for mixed groups of pirates and sea rovers at the same time such groups of predators established contacts with women of varied backgrounds in the Caribbean and the Indian Ocean. As such female agency formed part of the economic and social infrastructure which supported maritime enterprise of contested legality. But it co existed with the victimisation of women by pirates including the Barbary corsairs. As this study demonstrates the interplay between agency and victimhood was manifest in a campaign of petitioning which challenged male perceptions of women's status as victims. Against this background the book also examines the role of a small number of women pirates including the lives of Mary Read and Ann Bonny while addressing the broader issue of limited female recruitment into piracy. JOHN C APPLEBY is Senior Lecturer in History at Liverpool Hope University.

Politics and the Histories of International Law, 2021-07-19 What are the implications of writing the history of legal issues? Eighteen authors from different legal systems and backgrounds offer different answers by examining the history writing on issues ranging from slavery over the use of force to extraterritorial jurisdiction. Contributions show how historiography has often distorted or neglected regional cultures and suggest alternative methods and approaches to history writing. These studies are highly relevant for current international relations in which the fight over master narratives is especially fierce among governments in different academic fields and also between governments and academics. Captives and Corsairs Gillian Weiss,2011-03-11 Captives and Corsairs uncovers a forgotten story in the history of relations between the West and Islam three centuries of Muslim corsair raids on French ships and shores and the resulting captivity of tens of thousands of French subjects and citizens in North Africa Through an analysis of archival materials writings and images produced by contemporaries the book fundamentally revises our picture of France s emergence as a nation and a colonial power presenting the Mediterranean as an essential vantage point for studying the rise of France It reveals how efforts to liberate slaves from North Africa shaped France s perceptions of the Muslim world and of their own Frenchness From around 1550 to 1830 freeing these captives evolved from an expression of Christian charity to a method of state building and eventually to a rationale for imperial expansion Captives and Corsairs thus advances new arguments about the fluid nature of slavery and firmly links captive redemption to state formation and in turn to the still vital ideology of liberatory conquest Program of the Annual Meeting - American Historical Association American Historical Association,2007 Some programs include also the programs of societies meeting concurrently with the association
