Narrative Research In Health And Illness:

Narrative Research in Health and Illness Brian Hurwitz, Trisha Greenhalgh, Vieda Skultans, 2004-10-15 This comprehensive book celebrates the coming of age of narrative in health care. It uses narrative to go beyond the patient's story and address social, cultural, ethical, psychological, organizational, and linguistic issues. This book has been written to help health professionals and social scientists to use narrative more effectively in their everyday work and writing. The book is split into three comprehensive sections: Narratives, Counter narratives, and Meta narratives. *Health, Illness and Disease* Havi Carel, Rachel Cooper, 2014-09-11 What counts as health or ill health? How do we deal with the fallibility of our own bodies? Should illness and disease be considered simply in biological terms or should considerations of its emotional impact dictate our treatment of it? Our understanding of health and illness has become increasingly more complex in the modern world as we are able to use medicine not only to fight disease but to control other aspects of our bodies, whether mood, blood pressure, or cholesterol. This collection of essays foregrounds the concepts of health and illness and patient experience within the philosophy of medicine, reflecting on the relationship between the ill person and society. Mental illness is considered alongside physical disease, and the important ramifications of society's differentiation between the two are brought to light. *Health, Illness and Disease* is a significant contribution to shaping the parameters of the evolving field of philosophy of medicine and will be of interest to medical practitioners and policy makers as well as philosophers of science and ethicists.

The Research Process in Nursing Kate Gerrish, Anne Lacey, 2013-04-02 The perfect text for any health care professional who wishes to gain a sound understanding of research. This text succeeds where others fail in terms of the thoroughness of the research process and the accessible style in which the material is presented. In an age when nursing and health care research is going from strength to strength, this book offers those in the world of academia and practice an excellent and essential bible that is a must on any bookshelf. Dr Aisha Holloway, Lecturer, Adult Health Division of Nursing, The University of Nottingham, a book that helps you each step of the way. A very understandable and enjoyable publication. *Accident and Emergency Nursing Journal*, key reference resource that students of research can use at various levels of study. It is comprehensive, user friendly, and very easy to read and make sense of. Gillian E Lang, Amazon reviewer. The sixth edition of this book reflects significant developments in nursing research in recent years, ensuring the reader is provided with the very latest information on research processes and methods. It continues to explore how to undertake research as well as evaluating and using research findings in clinical practice in a way that is suitable for both novice researchers and those with more experience. Divided into six sections, the chapters are ordered in a logical fashion that also allows the reader to dip in and out. The first two sections of the book provide a comprehensive background to research in nursing. The third section presents a variety of qualitative and quantitative approaches, both new and well established. The final three sections then look at collecting and making sense of the resulting data and putting the research findings into clinical practice. Summarises key

points at the start of each chapter to guide you through Includes contributions from a wide range of experts in the field Accessible but doesn't shrink away from complex debates and technical issues New to this edition Accompanying website www.wiley.com/go/gerrish Ten completely new chapters including Narrative Research Mixed Methods and Using Research in Clinical Practice Research Example boxes from a wide variety of research types **Cultural Contexts of Health** Centers of Disease Control, 2016-10-24 Storytelling is an essential tool for reporting and illuminating the cultural contexts of health the practices and behavior that groups of people share and that are defined by customs language and geography This report reviews the literature on narrative research offers some quality criteria for appraising it and gives three detailed case examples diet and nutrition well being and mental health in refugees and asylum seekers Storytelling and story interpretation belong to the humanistic disciplines and are not a pure science although established techniques of social science can be applied to ensure rigor in sampling and data analysis The case studies illustrate how narrative research can convey the individual experience of illness and well being thereby complementing and sometimes challenging epidemiological and public health evidence **Developing a Narrative Approach to Healthcare Research** Martin, Viv, 2011 Patients perspectives on their experiences of illness and treatment are increasingly valued by the medical profession as a source of information to enhance professional development peer support and the quality of care provided This book explores the development of an in depth relational and reflexive approach to narrative inquiry drawing on counselling and arts based approaches to researching accounts of illness The significance of patient stories is explored through narrative research conversations with people whose personal accounts of a range of conditions provide powerful insights into the impact of illness on identity life stories and the experience of patienthood It offers suggestions for using narrative methods in medical education and practice to help professionals to both attend to patients narratives and reflect on their own stories Developing a Narrative Approach to Healthcare Research will be of interest to educators practitioners students and researchers in healthcare and the social sciences I will recommend this book to my students I hope other healthcare professionals will do the same and that some like me will go on to explore how narrative and story can be harnessed to both explore experience and to teach within healthcare from the Foreword by Karen Forbes I would recommend this book to everybody who is involved in caring for people who suffer serious illness whether they are professionals family or friends I also recommend it to social scientists and health professionals who want to conduct research in ways that capture the richness of peoples lived experience Kim Etherington Professor of Narrative and Life Story Research University of Bristol UK *Health and Illness in the Neoliberal Era in Europe* Jonathan Gabe, Mario Cardano, Angela Genova, 2020-11-26 Health and illness in the Neoliberal Era in Europe discusses the impact of neoliberalism on public health and the social construction of health and illness in Europe analysing case studies at a European and national level **Health, Illness and Culture** Lars-Christer Hydén, Jens Brockmeier, 2008-06-03 This collection of essays examines the interrelations between illness

Qualitative Research In Health Care Holloway, Immy,2005-06-01 This edited text on qualitative research methods in health is aimed at a multi professional multi disciplinary audience It explains qualitative methods applied specifically to health care research and draws extensively on European examples Handbook of Theory and Methods in Applied Health Research Catherine Walshe,Sarah Brearley,2020-07-31 This Handbook expertly instructs the reader on how to conduct applied health research across a number of disciplines Particularly aimed at postgraduate health researchers and students of applied health research it presents and explains a wide range of research designs and other contemporary issues in applied health research **Arts Based Health Care Research: A Multidisciplinary Perspective** Kathryn Hinsliff-Smith,Julie McGarry,Parveen Ali,2022-08-08 This book written by academics across a range of disciplines including healthcare and social sciences discusses the increasing use of the arts in healthcare research which often stems from the recognition that for some topics of investigation or when dealing with sensitive issues the usual qualitative or quantitative paradigms are not appropriate While there is undoubtedly a place for such approaches arts based research paradigms ABR offers not only additional study and data collection tools but also provides a new and enjoyable experience for those involved The use of the arts as a medium to improve health and wellbeing was well documented by the World Health Organisation WHO in 2019 with over 3 000 studies conducted around the globe on the value of the arts in the prevention of ill health and promotion of health across the life span This book examines how the arts in a variety of forms can be used by those working directly in healthcare settings as well as those involved in research across all health or patient settings Covering a range of ABR genres including literature such as narrative and poetic inquiry performance music dance play building visual arts drawing and painting collage installation art comics and audio visual and multimethod approaches this user friendly book will appeal to nurses researchers in nursing and allied healthcare professions as well professionals in the social sciences psychosociology psychology literature and arts *Doing Narrative Research* Molly Andrews,Corinne Squire,Maria Tamboukou,2013-07-22 Written by an international team of experts in the field the second edition of this popular text considers both the theoretical underpinnings and practical applications of narrative research The authors take the reader from initial decisions about forms of narrative research through more complex issues of reflexivity interpretation and the research context Existing chapters

have been updated to reflect changes in the literature and new chapters from eminent narrative scholars in Europe Australia and the United States have been added on a variety of topics including narratives and embodiment visual narratives narratives and storyworlds new media narratives and Deleuzian perspectives in narrative research This book will be invaluable for all students researchers and academics looking to use narrative methods in their own social research

Making Sense Of: Health, Illness and Disease ,2021-10-25 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences Researchers and health care practitioners now live in the age of interdisciplinarity which has transformed both health care delivery and research on health The essays in this collection transcend the traditional boundaries of biomedicine and draw attention to the many ways in which health is embedded in socio cultural norms and how these norms in turn shape health practices and health care This volume is of interest not only to researchers but also to those delivering health care

Practice-based Evidence for Healthcare John Gabbay,Andrée le May,2010-11-19 Despite its gold standard status the EBP movement is faltering because while much effort has gone into developing an idealised model of the way clinicians ought to use best evidence there is less understanding of why they often don t This book examines how clinicians do actually develop and use clinical knowledge

Reporting Mental Illness in China Guy Ramsay,2020-10-29 This book examines how Chinese language newspapers across greater China report on severe mental illness and why they do so in the ways they do given that reporting in local newspapers can strongly influence how Chinese readers view the illness By assessing how the reporting in three leading broadsheet newspapers from mainland China Hong Kong and Taiwan constructs the illness the book considers how the distinct social and political histories of the three culturally Chinese communities shape the reporting and whether it bears out or contests the intense stigma against the illness that prevails locally The findings can usefully encourage and inform attempts to humanise include and empower those with a severe mental illness across greater China and the global Chinese diaspora Employing a well tested transparent discourse analytic approach the book also includes numerous Chinese English bilingual news report extracts to illustrate its claims As such Reporting Mental Illness in China will be of interest to sinologists discourse analysts mental health professionals and public health authorities across the globe especially in places where there are large Chinese speaking populations
