**Community Development Arenas In Singapore** S Vasoo,Bilveer Singh,Xian Jie Chan,2019-09-26 In the last two decades or so community development efforts in Singapore have strongly focused on task centred community activities namely short term projects revolving around socio educational and recreational activities Such an emphasis is further reinforced by the outsourcing of community services to the private sector which is contracted to deliver services or activities

symptoms and cope with medical illnesses      **Creative Arts in Counseling and Mental Health** Philip Neilsen, Robert King, Felicity Baker, 2015-06-26 Drawing on new paradigms and evidence based discoveries in neuroscience narrative psychology and creativity theory this text explores the beneficial role of expressive arts within a recovery perspective A framework of practice principles for the visual arts creative writing music drama dance and digital storytelling is addressed across a number of settings and populations providing readers with an accessible overview of techniques taught in counseling programs in the U S and abroad      Relational Being Kenneth J. Gergen, 2009-07-30 This book builds on two current developments in psychology scholarship and practice The first centers on broad discontent with the individualist tradition in which the rational agent or autonomous self is considered the fundamental atom of social life Critique of individualism spring not only from psychologists working in the academy but also from communities of therapy and counseling The second and related development from which this work builds is the search for alternatives to individualist understanding Thus therapists such as Steve Mitchell along with feminists at the Stone Center expand the psychoanalytic tradition to include a relational orientation to therapy The present volume will give voice to the critique of individualism but its major thrust is to develop and illustrate a far more radical and potentially exciting landscape of relational thought and practice that now exists Most existing attempts to build a relational foundation remain committed to a residual form of individualist psychology The present work carves out a space of understanding in which relational process stands prior to the very concept of the individual More broadly the book attempts to develop a thoroughgoing relational account of human activity In doing so Gergen reconstitutes the mind as a manifestation of relationships and bears out these ideas in a range of everyday professional practices including family therapy collaborative classrooms and organizational psychology
