Narrative Therapy Catrina Brown,Tod Augusta-Scott,2006-08-03 This volume is especially useful in demonstrating the effects of placing social discourses at the center of therapy It goes many sacred cows of the larger modernist therapeutic community but in doing so it offers new ideas for mental health professionals attempting to help their clients with common and serious life problems PSYCRITIQUES This compilation is an insightful read for practitioners who have not taken the opportunity to use narrative therapy in practice Experienced practitioners will certainly appreciate the theoretical analysis offered by the writers as well as the opportunity for reflective practice Narrative Therapy is a meaningful contribution to a Canadian book market lacking in clinical literature for social workers CANADIAN ASSOCIATION OF SOCIAL WORKERS Narrative Therapy Making Meaning Making Lives offers a comprehensive introduction to and critique of narrative therapy and its theories This edited volume introduces students to the history and theory of narrative therapy Authors Catrina Brown and Tod Augusta Scott situate this approach to theory and practice within the context of various feminist post modern and critical theories Through the presentation of case studies

Narrative Therapy Making Meaning Making Lives shows how this narrative oriented theory can be applied in the client therapist experience Many important therapeutic situations abuse addictions eating disorders and more are addressed from the narrative perspective Rooted in social constructionism and emerging initially from family therapy narrative therapy emphasizes the idea that we live storied lives Within this approach the editors and contributors seek to show how we make sense of our lives and experiences by ascribing meaning through stories which themselves arise within social conversations and culturally available discourses Our stories don t simply represent us or mirror lived events they actually constitute us shaping our lives as well as our relationships Narrative Therapy will be a valuable supplemental textbook for theory and practice courses in departments of Counseling and Psychotherapy and of Social Work as well as for courses in Gender and Women Studies

The Narrative Journey John R. Stillman, 2012-07-20 The Narrative Journey An Illustrated Guide to Narrative Therapy Principles uses a journey metaphor to take the reader through the experience of narrative therapy This guidebook was conceived when John Stillman was invited to train social workers who were practicing within a community working and living on a garbage dump in Kien Giang Vietnam It makes narrative principles accessible to people through illustration and story Each of the principles is woven into the metaphor of a journey and is beautifully illustrated with an image that gives the reader an experiential relationship with narrative principles Since training in Vietnam Mr Stillman has used this guidebook in narrative training sessions in the United States Korea Greece Turkey and France with wonderful results and feedback Narrative principles respect that people can determine what they want in life and keep their positions at the center of interactions Narrative therapy also allows individuals and communities to explore what is important in their daily lives and relationships The narrative principles laid out in this guidebook offer entry points to multiple conversations

Working with Narrative in Emotion-focused Therapy Lynne E. Angus, Leslie S. Greenberg, 2011 In psychotherapy as in life all significant emotions are embedded in important stories and all significant stories revolve around important emotional themes Yet despite the interaction between emotion and narrative processes emotion focused therapy EFT and narrative informed therapies have evolved as separate clinical approaches In this book Lynne Angus and Leslie Greenberg address this gap and present a groundbreaking empirically based model that integrates working with narrative and emotion processes in EFT According to Angus and Greenberg s narrative informed approach to EFT all successful psychotherapy entails the articulation revision and deconstruction of clients maladaptive life stories in favor of more life enhancing alternatives Because emotions and narratives interact to form meaning and sense of self the evocation and articulation of emotions is critical to changing life narratives Individual chapters describe how the interaction between emotion and narrative creates a constantly evolving sense of self how clinicians can address both narrative and emotion processes to help clients create more adaptive empowering meanings and sense of self and the importance of a strong therapeutic alliance Engaging in depth case studies at the end of the book illustrate how the model can be applied to treatment of depression and emotional trauma
