### NARWHAL

Narwhals are mammals. They are also known as the unicorns of the sea or toothed whales. Narwhals live in the Arctic water of Canada, Greenland, Norway, and Russia. They are known for their 10 foot long spiral tusks. Tusks are mostly found in the males, and some even have two tusks! Their tusks are actually their teeth. They are used to tell temperature, water pressure, and motion. Narwhals eat many types of seafood like halibut, cod, squid, and more. Did you know that narwhals change color with age? They start out as speckled blue-grey, then change to blue-black, and then as adults they change to speckled grey. Adult male narwhals weigh around 3,500 pounds. Some narwhals can live up to 50 years.
