Radiance Of France:

The Radiance of France, new edition Gabrielle Hecht, 2009-07-31 How it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else In the aftermath of World War II as France sought a distinctive role for itself in the modern postcolonial world the nation and its leaders enthusiastically embraced large technological projects in general and nuclear power in particular The Radiance of France asks how it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else To answer this question Gabrielle Hecht has forged an innovative combination of technology studies and cultural and political history in a book that as Michel Callon writes in the new foreword to this edition not only sheds new light on the role of technology in the construction of national identities but is also a seminal contribution to the history of contemporary France Proposing the concept of technopolitical regime as a way to analyze the social political cultural and technological dynamics among engineering elites unionized workers and rural communities Hecht shows how the history of France's first generation of nuclear reactors is also a history of the multiple meanings of nationalism from the postwar period and France's desire for post Vichy redemption to 1969 and the adoption of a Frenchified American design This paperback edition of Hecht's groundbreaking book includes both Callon's foreword and an afterword by the author in which she brings the story up to date and reflects on such recent developments as the 2007 French presidential election the promotion of nuclear power as the solution to climate change and France's aggressive exporting of nuclear technology

France in the Age of Organization Jackie Clarke, 2011-06-01 In interwar France there was a growing sense that organization was the solution to the nation's perceived social economic and political ills This book examines the roots of this idea in the industrial rationalization movement and its manifestations in areas as diverse as domestic organization and economic planning In doing so it shows how experts in fields ranging from engineering to the biological sciences shaped visions of a rational socio economic order from the 1920s to Vichy and beyond

France and Its Empire Since 1870 Alice L. Conklin, Sarah Fishman, Robert Zaretsky, 2015 Providing an up to date synthesis of the history of an extraordinary nation one that has been shrouded in myths many of its own making France and Its Empire Since 1870 seeks both to understand these myths and to uncover the complicated and often contradictory realities that underpin them It situates modern French history in transnational and global contexts and also integrates the themes of imperialism and immigration into the traditional narrative Authors Alice L Conklin Sarah Fishman and Robert Zaretsky begin with the premise that while France and the U S are sister republics they also exhibit profound differences that are as compelling as their apparent similarities The authors frame the book around the contested emergence of the French Republic a form of government that finally appears to have a permanent status in France but whose birth pangs were much more protracted than those of the American Republic Presenting a lively and coherent narrative of the major developments in France's

tumultuous history since 1870 the authors organize the chapters around the country's many turning points and confrontations They also offer detailed analyses of politics society and culture considering the diverse viewpoints of men and women from every background including the working class and the bourgeoisie immigrants Catholics Jews and Muslims Bretons and Algerians rebellious youth and gays and lesbians

Nuclear France Benoît Pelopidas, 2023-12-13 This book offers the first non official history of French nuclear policies which goes beyond the divide between nuclear weapons and nuclear energy policies It addresses the sizing of France's nuclear forces technological assistance to countries with nuclear weapons programs uranium prospection nuclear testing its health effects and protests against it as well as plans to prevent and manage accidents in nuclear power plants It is based on new questions and new sources from France and abroad The chapters in this volume show how independent and interdisciplinary scholarship free from conflicts of interests can uniquely advance our understanding of nuclear history and politics This is the case because it does not treat the categories and judgments of official discourse as neutral starting points of the analysis This volume is based on untapped primary sources from France the UK the US India South Africa and Iran on a new assessment of the health consequences of French nuclear testing in Polynesia thanks to a modern atmospheric particle transport code coupled with historical weather data open source information about radioactive debris mushroom clouds as well as data on the composition and particle sizes of the fallout and on new survey data about French knowledge of and attitudes towards nuclear weapons and nuclear energy They show notably that the first generation of French nuclear forces lacked technical credibility despite reliance on outside help Several French officials knew this as did France's allies and adversaries Moreover French strategic collaborations associated to nuclear programs extended to India and South Africa nuclear safety regulations changed fundamentally after the Cold War and approximately 110 000 people i e 90% of the French Polynesian population in the 1970s could have received doses that would qualify them for compensation according to French law The volume will be of interest to scholars and students of history politics international relations military history war studies conflict and global governance Most of the chapters in this book were originally published as a special issue in Cold War History A few chapters were first published in the Nonproliferation Review Diplomacy Statecraft and Science Global Security

Constructing Iron Europe Irene Anastasiadou, 2011-12-01 Conventional histories portray the development of railway infrastructures as a tool to build empires and nation states Recent scholarship however has stressed the importance of a transnational perspective beyond an exclusive focus on the nation state The new perspective enriches both the history of modern Europe and European integration Constructing Iron Europe demonstrates how during the interwar years key players saw railroads as instruments for building a transnational European community Based on new archival research Anastasiadou not only sheds light on patterns of internationalization of railways but also explores the co construction of the national and the European in the case of the Greek railways in the Interbellum period Foundation for the

History of Technology Amsterdam University Press Technology and European History Series TEHS *The Light-Green Society* Michael Bess, 2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life On the other human activities have laid an ever more potent and pervasive touch on the environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place

A Debate to Remember Chaitanya Ravi, 2018-04-19 The US India nuclear deal popularly known as the 123 Agreement announced by George W Bush and Manmohan Singh on 18 July 2005 was a defining moment in the relationship of the two countries as also India's relationship with the non proliferation regime The Bush administration's implied recognition of India's nuclear weapons and its abrupt reversal of three decades of sanctions to restore Indian access to nuclear fuel reactors and dual use technologies despite being a non proliferation treaty non signatory led to contentious debates in both India and the USA A Debate to Remember emphasizes the multifaceted debate in India over the nuclear deal using concepts from science and technology studies It focuses on the intense contestation over the civil military mix of India's separation plan the competition between the Iran Pakistan India pipeline and the nuclear deal the role of retired nuclear scientists and the issue of liability that has stalled the full implementation of the nuclear deal The impact of domestic factors on issues ranging from the civil military status of breeder reactors to the Indian insistence on no restriction on future nuclear testing in the 123 Agreement is also revealed in this book

Nuclear Decisions Lisa Langdon Koch, 2023 For decades countries have pursued nuclear weapons by taking many different paths toward or away from the bomb Those paths have been difficult to predict because they are defined not by security or wealth but by the decisions leaders make to accelerate or reverse their nuclear weapons programs Nuclear decisions are made within a complex political information environment that affects how security concerns and the value of a nuclear weapons program are understood By examining nine fascinating country case histories this book elucidates the key factors that shape the decision making environment

Cold War Holidays Christopher Endy, 2005-12-15 Moving beyond traditional state centered conceptions of foreign relations Christopher Endy approaches the Cold War era relationship between France and the United States from the original perspective of tourism Focusing on American travel in France after World War II Cold War Holidays shows how both

the U S and French governments actively cultivated and shaped leisure travel to advance their foreign policy agendas From the U S government s campaign to encourage American vacations in Western Europe as part of the Marshall Plan to Charles de Gaulle s aggressive promotion of American tourism to France in the 1960s Endy reveals how consumerism and globalization played a major role in transatlantic affairs Yet contrary to analyses of globalization that emphasize the decline of the nation state Endy argues that an era notable for the rise of informal transnational exchanges was also a time of entrenched national identity and persistent state power A lively array of voices informs Endy s analysis Parisian hoteliers and cafe waiters American and French diplomats advertising and airline executives travel writers and tourists themselves The resulting portrait reveals tourism as a colorful and consequential illustration of the changing nature of international relations in an age of globalization

Mobilizing nature Chris Pearson,2017-10-03 Mobilizing nature traces the environmental history of war and militarisation in France from the creation of Ch lons Camp in 1857 to military environmentalist policies in the twentieth century It offers a fresh perspective on the well known histories of the Franco Prussian War Western Front 1914 18 Second World War Cold War and the anti base campaign at Larzac whilst uncovering the largely hidden history of the numerous military bases and other installations that pepper the French countryside Mobilising nature argues that the history of war and militarisation can only be fully understood if human and environmental histories are considered in tandem Preparing for and conducting wars were only made possible through the active manipulation and mobilisation of topographies climatic conditions vegetation and animals But the military has not monopolised the mobilisation of nature Protesters against militarisation have consistently drawn on images of peaceful and productive civilian environments as the preferable alternative to destructive tanks and bombs Written in an accessible style Mobilizing nature will appeal to readers interested in modern France environmental history military geographies and histories anti military protests and environmentalism

Confluence Sara B. Pritchard,2011-04-04 Sara B Pritchard traces the Rh ne s remaking since 1945 showing how state officials technical elites and citizens connected the environment and technology to political identities and state building and demonstrating the importance of environmental management and technological development to the culture and politics of modern France

In Mortal Hands Stephanie Cooke,2009-07-01 This landmark history of nuclear power is perfectly timed for today when Americans are gravely concerned with nuclear terrorism and a nuclear renaissance is seen as a possible solution to global warming Few have truly come to terms with the complexities of an issue which may determine the future of the planet Nuclear weapons it was once hoped would bring wars to a close instead they spurred a massive arms race that has recently expanded to include North Korea and Iran Once seen as a source of unlimited electricity nuclear reactors breed contamination and have been used as covers for secret weapons programs from India and Pakistan to Iraq and Iran The evolving story of nuclear power as told by industry insider Stephanie Cooke reveals the gradual deepening of our understanding of the pros and cons of this controversial energy source Drawing on her unprecedented access Cooke

shows us how time and again the stewards of the nuclear age the more is better military commanders and civilian nuclear boosters have fallen into the traps of their own hubris and wishful thinking as they tried to manage the unmanageable Their mistakes are on the verge of being repeated again which is why this book deserves especially close attention now Weekly Florists' Review Gilbert Leonard Grant,1928 Collaboration in the Pharmaceutical Industry Viviane Quirke,2012-10-12 Examining the issue of British decline after the war this fascinating text describes the evolution of cooperation in Britain and France and argues that the relationship between these two countries helped to disseminate a culture of research resulting in the transformation of the medical sciences and the pharmaceutical industry in both countries Of interest to a wide range of academic disciplines this highly relevant book discusses topics including penicillin sulphamide drugs and the effects of war in both countries *Technologies of Power* Michael Thad Allen,Gabrielle Hecht,2001-05-25 This collection explores how technologies become forms of power how people embed their authority in technological systems and how the machines and the knowledge that make up technical systems strengthen or reshape social political and cultural power The authors suggest ways in which a more nuanced investigation of technology s complex history can enrich our understanding of the changing meanings of modernity They consider the relationship among the state expertise and authority the construction of national identity changes in the structure and distribution of labor political ideology and industrial development and political practices during the Cold War The essays show how insight into the technological aspects of such broad processes can help synthesize material and cultural methods of inquiry and how reframing technology s past in broader historical terms can suggest new directions for science and technology studies The essays were written in honor of Thomas Parke Hughes and Agatha Chipley Hughes whose spirit of inquiry they seek to continue Contributors Janet Abbate Michael Thad Allen W Bernard Carlson Gabrielle Hecht Erik P Rau Eric Schatzberg Amy Slaton John Staudenmaier Edmund N Todd Hans Weinberger *The Power of the Space Club* Deganit Paikowsky,2017-07-20 This book analyses the decisions of nations to develop indigenous space programs in order to become a leading world power **The Economic History of Nuclear Energy in Spain** M.d.Mar Rubio-Varas,Joseba De la Torre,2017-11-10 This book analyses the economic history of the nuclear program in Spain from its inception in the 1950s to the nuclear moratorium in the early 1980s and investigates the economic financial and business origins of atomic energy in Spain The actual dimension of the Spanish nuclear sector which exceeded the relative economic and political clout of the country at the time reflects the combination of domestic and foreign interests Each contribution inserts the Spanish case within the international development of nuclear energy but also shows how the Spanish nuclear program came about how it was financed and who the main architects and beneficiaries at the industrial financial commercial and banking levels were all without losing sight of the energy policy aspects such as energy mix and energy security The volume provides useful analysis and sources for a variety of core fields across the social sciences including economic history of post war Europe industrial and energy policy international relations and history of technology

The Gilded Cage Ya-Wen Lei, 2023-11-21 How China's economic development combines a veneer of unprecedented progress with the increasingly despotic rule of surveillance over all aspects of life Since the mid 2000s the Chinese state has increasingly shifted away from labor intensive export oriented manufacturing to a process of socioeconomic development centered on science and technology Ya Wen Lei traces the contours of this techno developmental regime and its resulting form of techno state capitalism telling the stories of those whose lives have been transformed for better and worse by China's rapid rise to economic and technological dominance Drawing on groundbreaking fieldwork and a wealth of in depth interviews with managers business owners workers software engineers and local government officials Lei describes the vastly unequal values assigned to economic sectors deemed high end versus low end and the massive expansion of technical and legal instruments used to measure and control workers and capital She shows how China's rise has been uniquely shaped by its time compressed development the complex relationship between the nation's authoritarian state and its increasingly powerful but unruly tech companies and an ideology that fuses nationalism with high modernism technological fetishism and meritocracy Some have compared China's extraordinary transformation to America's Gilded Age This provocative book reveals how it is more like a gilded cage one in which the Chinese state and tech capital are producing rising inequality and new forms of social exclusion

The stadium century Robert W. Lewis, 2016-12-08 The stadium century traces the history of stadia and mass spectatorship in modern France from the velodromes of the late nineteenth century to the construction of the Stade de France before the 1998 soccer World Cup As the book demonstrates the stadium was at the centre of debates over public health and urban development and proved to be a key space for mobilising the urban crowd for political rallies and spectator sporting events alike After 1945 the transformed French stadium constituted part of the process of postwar modernisation but also was increasingly connected to global transformations to the spaces and practices of sport Drawing from a wide range of sources the stadium century links the histories of French urbanism mass politics and sport through the stadium in an innovative work that will appeal to historians students of French history and the history of sport and general readers alike

The Top Books of the Year Radiance Of France The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. Radiance Of France : Colleen Hoover "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Radiance Of France : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
