Radiation Controversy:

The Radiation Controversy Ralph E. Lapp, 1979 *Controversies in the Management of Gynecological Cancers* Jonathan A. Ledermann, Carien L. Creutzberg, Michael A. Quinn, 2013-12-13 This is a novel text that highlights the controversial areas in the management of gynecological cancers None of the topics in this book have definitive answers they represent the everyday decision making facing gynecologists oncologists radiologists pathologists and other health professionals treating women with these conditions This book is not to be used as a traditional textbook it is a text that specialists and trainees will use to help them weigh up the arguments that exist in a variety of areas in the treatment of gynecological cancers Each chapter will have two or more authors selected either for their opposing views or for their ability to provide an opposite view or opinion to the other The content will be evidence based illustrating contrasting evidence and scientific opinion in the literature Each chapter will close on a summary indicating the direction of research needed to address the issues being discussed Bulletin of the Atomic Scientists , 1971-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Science, Politics, And Controversy** Stephen L Del Sesto, 2019-06-26 As of June 1977 the United States had some 232 nuclear power plants either planned or in operation with a generating capacity estimated at about 321 million kilowatts To date the industrial world has spent over 200 billion in order to produce useful energy from nuclear fission By all odds civilian nuclear power is one of the largest technological ventures in history To many this massive effort is completely justified No other single technology offers as much promise for satisfying world energy needs in the years ahead particularly as fossil fuels dwindle and climb drastically in price Yet to others there is no single technology which raises such serious questions of risk to public health and safety **Controversies in Public Health and Health Policy** Jan Kirk Carney, 2015-07-20 This unique text engages students in learning about public health and health policy through a study of current controversies The textbook uses a structured format to examine each controversy with discussion questions and additional learning resources Many issues connect public health and health care an important perspective given the Patient Protection and Affordable Care Act and health system changes at the state level To get to the root of the controversy and gain insight as to what must be done to advance the health issue learners must grasp the breadth and scope of the issue and evidence base for prevention dissect out root causes and barriers then propose strategies for progress Some of the topics covered include the acceptance of obesity as a cultural norm e cigarettes binge drinking on college campuses prescription drug abuse antibiotic resistance gun control preventing concussions climate change and more Publisher **NASA's Organizational and Management Challenges in the Wake of the Columbia Disaster** United States. Committee on Appropriations. Subcommittee on Energy and Water Development,1995 Nuclear Power and Public Policy Kristin Shrader-Frechette,2012-12-06 This book grew out of projects funded by the Kentucky Humanities Council in 1974 and 1975 and by the Environmental Protection Agency in 1976 and 1977 As a result of the generosity of these two agencies I was able to study the logical methodological and ethical assumptions inherent in the decision to utilize nuclear fission for generating electricity Since both grants gave me the opportunity to survey public policy making I discovered that there were critical lacunae in allegedly comprehensive analyses of various energy technologies Ever since this discovery one of my goals has been to fill one of these gaps by writing a well documented study of some neglected social and ethical questions regarding nuclear power Although many assessments of atomic energy written by environmentalists are highly persuasive they often also are overly emotive and question begging Sometimes they employ what seem to be correct ethical conclusions but they do so largely in an intuitive rather than a closely reasoned manner On the other hand books and reports written by nuclear proponents often Under government contract almost always ignore the social and ethical aspects of energy decision making they focus instead only on a purely scientific assessment of fission generation of electricity What the energy debate needs I believe are more studies which aim at ethical analysis and which avoid unsubstantiated assertions I hope that these essays are steps in that direction **Sustainable Media** Nicole Starosielski,Janet Walker,2016-02-19 Sustainable Media explores the many ways that media and environment are intertwined from the exploitation of natural and human resources during media production to the installation and disposal of media in the landscape from people's engagement with environmental issues in film television and digital media to the mediating properties of ecologies themselves Edited by Nicole Starosielski and Janet Walker the assembled chapters expose how the social and representational practices of media culture are necessarily caught up with technologies infrastructures and environments Through in depth analyses of media theories practices and objects including cell phone towers ecologically themed video games Geiger counters for registering radiation and sound waves traveling through the ocean contributors question the sustainability of the media we build exchange and inhabit and chart emerging alternatives for media ecologies *Development of Facilities in San Diego to Support the Homeporting of One NIMITZ Class Aircraft Carrier, San Diego County* ,1995 **Energy Research Abstracts** ,1977 Semiannual with semiannual and annual indexes References to all
