Radiation Protection Jacob Shapiro,2002 This highly successful manual has served for nearly three decades as the definitive guide to the safe use of radioactive materials Completely revised and updated the fourth edition presents a new dimension by adding coverage of nonionizing radiation and is thus concerned with the entire field of radiation protection The author takes the novel approach of introducing the whole range of energies possessed by particles and electromagnetic

waves at the beginning of the text thus integrating coverage of ionizing and nonionizing radiation rather than considering them as two separate disciplines He goes on to cover the entire spectrum of radiation sources including radionuclides x ray machines accelerators nuclear reactors power lines microwave towers and cellular phones With its expanded coverage including a broader focus on public health issues this new volume will serve as an important training and reference resource not only for research scientists physicians and engineers but for regulatory officials attorneys engineers and environmental health and safety professionals The breadth of citations alone makes this resource invaluable **Management of Terrorist Events Involving Radioactive Material** National Council on Radiation Protection and Measurements,2001

Visconti,E. Russell Ritenour,Kelli Welch Haynes,2017-09-16 Gain a full understanding of both basic and complex concepts in radiation protection biology and physics Beautifully designed and easy to follow Radiation Protection in Medical Radiography 8th Edition promotes the safe use of ionizing radiation in all imaging modalities including the effects of radiation on humans at the cellular and systemic levels regulatory and advisory limits for human exposure to radiation and the implementation of radiation safety practices for patients and personnel This market leading text reflects the latest ARRT and ASRT curriculum guidelines to help you succeed on the ARRT exam Plus the new edition includes tables with sensitivity ranges to provide easy reference for each type of dosimeter Convenient easy to use features include chapter outlines and objectives listing and highlighting of key terms and bulleted summaries general discussion questions and review questions to enhance student comprehension and retention NCRP and ICRP content includes guidelines regulations and radiation quantities and units explaining the effects of low level ionizing radiation demonstrating the link between radiation and cancer and other diseases and providing the regulatory perspective needed for practice Clear and concise writing style covers complex concepts in radiation protection biology and physics in a building block approach from basic to more complex concepts Timely coverage

of radiation protection regulations addresses radiation awareness and education efforts across the globe NEW Chapter Radiation Safety in Computed Tomography and Mammography compiles content on tomography and mammography into one chapter UPDATED Full color equipment images and illustrations reinforce important information UPDATED Content reflects the latest ARRT and ASRT curriculum guidelines Review questions are included at the end of chapters to assess your comprehension with answers on the Evolve companion website NEW Key word glossary helps you find and understand need to know terms NEW Additional tables with sensitivity ranges makes each type of dosimeters easy to reference

Management of Persons Accidentally Contaminated with Radionuclides National Council on Radiation Protection and Measurements,1980 *Fluence-based and Microdosimetric Event-based Methods for Radiation Protection in Space* National Council on Radiation Protection and Measurements,National Council on Radiation Protection and Measurements. Scientific Committee 88 on Fluence as the Basis for a Radiation Protection System for Astronauts,2001 **Limitation of Exposure to Ionizing Radiation** National Council on Radiation Protection and Measurements,1993 NCRP Report No 116 is the latest in the long series of reports on basic radiation protection criteria that began in 1934 It supersedes the predecessor in the series NCRP Report No 91 which was published in 1987 The current Report takes advantage of new information evaluations and thinking that have developed since 1987 particularly the risk estimate formulations set out in NCRP Report No 115 While the recommendations set out in this Report do not constitute a radical revision of the basic criteria they do represent a refinement of the system enunciated in Report No 91 Important changes include the utilization of revised tissue organ weighting factors and the introduction of radiation weighting factors Also noteworthy is the introduction of an allowable reference level of intake Noteworthy too is the recommendation of an age based lifetime limit for control of occupational exposures and a major simplification of limits aimed at controlling the exposure of the embryo and fetus This Report after outlining the goals and philosophy of radiation protection and the basis for exposure limits goes on to review in some detail absorbed dose equivalent dose radiation weighting factors and effective dose Committed equivalent dose and committed effective dose are also introduced Risk estimates for radiation exposure are presented and then the dose limits are enunciated The Report also covers exposure in excess of the limits limits for unusual occupational situations guidance for emergency occupational exposure and remedial action levels for naturally occurring radiation
