Cyberpop Sidney Eve Matrix, 2013-05-13 Cyberpop is an analysis of cyberculture and its popular cultural productions The study begins with a Foucaultian model of cyberculture as a discursive formation and explains how some key concepts such as virtuality speed and Connectivity operate as a conceptual architecture network linking technologies to information and individual subjects The chapters then each focus on a particular cyberfiguration including Hollywood films GATTACA The Matrix popular literature William Gibson's Neuromancer Scott Westerfeld's Polymorph advertising for digital products and services Apple Computer's 1984 McIntosh campaign AT T's mLife campaign digital artworks including virtual females such as Motorola's Mya and Elite Modeling Agency's Webbie Tookay and work by visual artist Daniel Lee for Microsoft's Evolution campaign and video games TombRaider Each close reading illustrates the ways in which representations of digital lifestyles and identities which typically fetishize computers and celebrate a high tech aesthetic encourage participation in digital capitalism and commodity cyberculture Matrix argues that popular representations of cyberculture often function as forms of social criticism that creatively inspire audiences to think different in the words of Mac advertising about the consequences of the digitalization of everyday life

Collage of Myself Matt Miller, 2010-12-01 Collage of Myself presents a groundbreaking account of the creative story behind America's most celebrated collection of poems In the first book length study of Walt Whitman's journals and manuscripts Matt Miller demonstrates that until approximately 1854 only a single year before the first publication of Leaves of Grass Whitman who once speculated that Leaves would be a novel or a play was unaware that his ambitions would assume the form of poetry at all Collage of Myself details Whitman's discovery of a remarkable new creative process that allowed him to transform a diverse array of texts into poems such as Song of Myself and The Sleepers Whitman embraced an art of fragments that encouraged him to cut and paste his lines into ever evolving forms based on what he called spinal ideas This approach to language Miller argues represents the first major use in the Western arts of the technique later known as collage an observation with significant ramifications for our reception of subsequent artists and writers Long before the modernists Whitman integrated found text and ready made language into a revolutionary formulation of artistic production that

anticipates much of what is exciting about modern and postmodern art Using the Walt Whitman Archive's collection of digital images to study what were previously scattered and inaccessible manuscript pages Miller provides a breakthrough in our understanding of the great American literary icon

Love's Next Meeting Aaron Lecklider, 2023-05-02 How queerness and radical politics intersected earlier than you thought Well before Stonewall a broad cross section of sexual dissidents took advantage of their space on the margins of American society to throw themselves into leftist campaigns Sensitive already to sexual marginalization they also saw how class inequality was exacerbated by the Great Depression witnessing the terrible bread lines and bread riots of the era They participated in radical labor organizing sympathized like many with the early prewar Soviet Union contributed to the Republicans in the Spanish Civil War opposed US police and state harassment fought racial discrimination and aligned themselves with the dispossessed Whether they were themselves straight gay or otherwise queer they brought sexual dissidence and radicalism into conversation at the height of the Left's influence on American culture Combining rich archival research with inventive analysis of art and literature Love's Next Meeting explores the relationship between homosexuality and the Left in American culture between 1920 and 1960 Aaron S Lecklider uncovers a lively cast of individuals and dynamic expressive works revealing remarkably progressive engagement with homosexuality among radicals workers and the poor Leftists connected sexual dissidence with radical gender politics antiracism and challenges to censorship and obscenity laws through the 1920s and 1930s In the process a wide array of activists organizers artists and writers laid the foundation for a radical movement through which homosexual lives and experiences were given shape and new political identities were forged Love's Next Meeting cuts to the heart of some of the biggest questions in American history questions about socialism about sexuality about the supposed clash still making headlines today between leftist politics and identity politics What emerges is a dramatic sexually vibrant story of the shared struggles for liberation across the twentieth century

Finding Nothing Gregory Betts, 2021-07-30 Experimental literature accelerated dramatically in Vancouver in the 1960s as the influence of New American poetics merged with the ideas of Marshall McLuhan Vancouver poets and artists began thinking about their creative works with new clarity and set about testing and redefining the boundaries of literature As new gardes in Vancouver explored the limits of text and language some writers began incorporating collage and concrete poetics into their work while others delved deeper into unsettling revolutionary and Surrealist imagery There was a presumption across the avant garde communities that radical openness could provoke widespread socio political change In other words the intermedia experimentation and the related destruction of the line between art and society pushed art to the frontlines of a broad socio political battle of the collective imagination of Vancouver Finding Nothing traces the rise of the radical avant garde in Vancouver from the initial salvos of the Tish group through Blewointment's spatial experiments to radical Surrealisms and new feminisms Incorporating images original texts and interviews Gregory Betts shows how the VanGardes signalled a remarkable consciousness of the globalized forces at play in the city impacting communities orientations races and nations

Michael Hays, 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self conscious

Collage in Twentieth-Century Art, Literature, and Culture Rona Cran, 2016-05-23 Emphasizing the diversity of twentieth century collage practices Rona Cran's book explores the role that it played in the work of Joseph Cornell William Burroughs Frank O Hara and Bob Dylan For all four collage was an important creative catalyst employed cathartically aggressively and experimentally Collage's catalytic effect Cran argues enabled each to overcome a potentially destabilizing crisis in representation Cornell convinced that he was an artist and yet hampered by his inability to draw or paint used collage to gain access to the art world and to show what he was capable of given the right medium Burroughs formal problems with linear composition were turned to his advantage by collage which enabled him to move beyond narrative and chronological requirement O Hara used collage to navigate an effective path between plastic art and literature and to choose the facets of each which best suited his compositional style Bob Dylan's self conscious application of collage techniques elevated his brand of rock and roll to a level of heightened aestheticism Throughout her book Cran shows that to delineate collage stringently as one thing or another is to severely limit our understanding of the work of the artists and writers who came to use it in non traditional ways *Nostalgia and Hope: Intersections between Politics of Culture, Welfare, and Migration in Europe* Ov Cristian Norocel, Anders Hellström, Martin Bak Jørgensen, 2020-06-02 This open access book shows how the politics of

migration affect community building in the 21st century drawing on both retrogressive and progressive forms of mobilization It elaborates theoretically and shows empirically how the two master frames of nostalgia and hope are used in local national and transnational settings in and outside conventional forms of doing politics It expands on polarized societal processes and external events relevant for the transformation of European welfare systems and the reproduction of national identities today It evidences the importance of gender in the narrative use of the master frames of nostalgia and hope either as an ideological tool for right wing populist and extreme right retrogressive mobilization or as an essential element of progressive intersectional politics of hope It uses both comparative and single case studies to address different perspectives and by means of various methodological approaches the manner in which the master frames of nostalgia and hope are articulated in the politics of culture welfare and migration The book is organized around three thematic sections whereby the first section deals with right wing populist party politics across Europe the second section deals with an articulation of politics beyond party politics by means of retrogressive mobilization and the third and last section deals with emancipatory initiatives beyond party politics as well **Free Radical Research** ,2003
