The Concept of Care in Curriculum Studies Jung-Hoon Jung, 2015-12-22 The question at the heart of the book is what might an education with self care and care for others look like Juxtaposing self understanding through the method of currere and the historical character of hakbeolism a concept indigenous to Korea referring to a kind of social status people achieve based on a shared academic background this book articulates how subjective reconstruction of self in conjunction with historical study can be transformative and how this can be extended to social change Articulating how having one's own standard can be a way of making one's life a work of art the author looks at how Korean schooling exercises coercive care disconfirmation and the whip of love for the children's own good Emphasis is given to the internalized status of these practices in both students and teachers and to teachers and parents culpability not only in exercising but also in reproducing these practices through themselves Going beyond describing and analysing the educational problem of academic intellectual achievement oriented education based on aggressive competition this book suggests ways to address these issues through autobiography using the method of currere to reconstruct one's subjectivity and an ethic of care

Shugarman, 2017-05-15 There have been enormous changes in Canadian public life in the past two decades More and more politicians and officials are expected to act honestly and in the public interest Yet for many honest politics is still an oxymoron Using high profile political scandals as case studies this book explores the standards of accountability to which Canadian politicians are now being held The authors discuss conflict of interest and abuse of trust cases such as Brian Mulroney's receipt at secret meetings of envelopes stuffed with thousand dollar bills the gas plant scandal in Ontario Allison Redford's self serving authorizations of spending in Alberta Mike Duffy and the Senate expenses scandal party financing cases such as the Robocalls affair dirty hands examples such as the sponsorship scandal and the Arrar affair the cash for access controversy surrounding Justin Trudeau's fundraisers and municipal issues including the sagas of Rob Ford and Hazel McCallion Canada is a leader among countries promoting ethical politics in a democratic society In this book expert authors from across the country discuss the strengths and weaknesses of measures now in place and point to the most important challenges that remain before Canadians can believe that honesty prevails in public life

Economic Globalisation as Religious War Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world

economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war The Pacific Ranginui Walker, William M. Sutherland, 1988 *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1973 The Societal Learning Approach Thomas D. Watts, 1981 **Ordinary Ecstasy** John Rowan, 2015-12-22 Humanistic Psychology ranges far and wide into education management gender issues and many other fields Ordinary Ecstasy first published in 1976 is widely regarded as one of the most important books on the subject Although this new edition still contains much of the original material it has been completely rethought in the light of postmodern ideas with more emphasis on the paradoxes within humanistic psychology and takes into account changes in many different areas with a greatly extended bibliography Ordinary Ecstasy is written not only for students and professionals involved in humanistic psychology anyone who works with people in any way will find it valuable and interesting The Analysis of Psychological Theory Henderikus J. Stam, Timothy B. Rogers, Kenneth J. Gergen, 1987 *Dictionary of Politics* Walter John Raymond, 1992 Determinants of Behavioral Development F. J. Mönks, Willard W. Hartup, Jan de Wit, 2013-09-24 Determinants of Behavioral Development documents the proceedings of the International Society for the Study of Behavioral Development s first symposium at the University of Nijmegen in The Netherlands 4 July 1971 The symposium was planned under the general theme Genetic and Social Influences on Psychological Development Perhaps the major contribution of the Nijmegen Symposium and of this volume is the establishment of a new linkage between European and American research in developmental psychology This volume contains 64 papers organized into eight parts The papers in Part I deal with issues of research strategy Part II presents studies on biological determinants of development Part III examines cultural and societal factors in development while Part IV focuses on the concepts of deprivation and enrichment Part V presents selected studies on infants Part VI investigates cognitive process in child development Part VII contains papers on socialization themes while Part VIII takes up adult development Models of Man J.J. Dagenais, 2012-12-06 This essay is first a theoretical and historical study of some classical scientific ways of studying human being in the world The more readily accessible and more commonly discussed models of being human were chosen for review here but structuralism is included because I believe it will have the same impact in America as it has had in France and I hope that American readers might be forewarned about what may be ideologically at stake before the technical and fruitful aspects of the movement become an academic fad in the United States The subjects included are mainline experimental psychology from Wundt to Skinner with its relatively shortlived functionalist and Watsonian behaviorist formulations holistic psychology from Brentano through Stumpf Husserl and Goldstein to Maslow Rogers and contemporary third force psychology and the psychoanalytic model for which the only paradigm is Freud himself Preeminence is given to psychological paradigms since their subject matter lies closest to the classical philosophical tradition

from which philosophical anthropology emerged This book is in the final analysis a prolegomenon to an articulated philosophical anthropology Sociological models are also considered the classical tradition from Comte to the present and Marxist anthropology from the manuscripts of 1844 to the present The structuralist model from Durkheim to Chomsky is also considered since it cuts across and gives new dimensions to all the foregoing models The essay is second a phenomenological critique of these historico theoretical considerations
