Radio-electronics, 1991 **Radio Monitoring** Anatoly Rembovsky, Alexander Ashikhmin, Vladimir Kozmin, Sergey M. Smolskiy, 2009-07-24 Radio Monitoring Problems Methods and Equipment offers a unified approach to fundamental aspects of Automated Radio Monitoring ARM The authors discuss the development modeling design and manufacture of ARM systems Data from established and recent research are presented and recommendations are made on methods and approaches for solving common problems in ARM The authors also provide classification and detailed descriptions of modern high efficient hardware software ARM equipment including the equipment for detection radio direction finding parameters measurement and their analysis and the identification and localization of the electromagnetic field sources Examples of ARM equipment structure applications and software are provided to manage a variety of complicated interference environment in the industrial centers inside of the buildings and in the open terrain This book provides a reference for professionals and researchers interested in deploying ARM technology as a tool for solving problems from radio frequency spectrum usage control **Electronics Technician 2** United States. Bureau of Naval Personnel, 1960 Reeds 21st Century Ship

Management John W Dickie, 2014-04-17 The first modern title to cover the varied and complex world of ship management in the 21st century Ship management has constantly had to evolve to take into account the advancements in technology as well as the demands of the shipping industry Having internet access and email on board ship has meant that the ship manager has to possess certain sets of skills to function effectively in the post including computer literacy The emergence of large multi national ship management companies has also changed how business is conducted and this in turn means that the ship manager and tiers of management within the organization have had to evolve to cope with the demands of working with a multi national workforce Furthermore since the mid 1980s there has been an ever expanding raft of legislation that is more restrictive for companies to meet and a shrinking of profit margins has seen a shift in how companies are required to operate to survive This book addresses the demands of 21st century ship management with the focus of the book as much on the people who manage ships as on the theory and practice of ship management **Lectures on Selected Topics in**

Statistical Mechanics D. Ter Haar, 2013-09-03 Lectures on Selected Topics in Statistical Mechanics is a collection of lectures given at the 1971 Simla Summer School of Statistical Mechanics held in India The lectures explore a wide range of topics related to statistical mechanics including occupation number representation the Green function method the pair Hamiltonian model of an imperfect Bose gas fluctuations in a perfect Bose gas and the equation of state of an imperfect gas A simple derivation of the Bloch equation is also presented along with the statistical mechanics of stellar systems Comprised of eight chapters this volume begins with a discussion on the occupation number representation by considering some relevant formulae from ensemble theory Classical petit and grand ensembles are described together with quanta1 petit and grand

ensembles Subsequent chapters focus on the Green function method in statistical mechanics the pair Hamiltonian model of the imperfect Bose gas and its solution in the absence of Bose Einstein condensation using Green function methods and diagrammatic techniques fluctuations in a perfect Bose gas the equation of state of an imperfect gas and a simple derivation of the Bloch equation Finally the statistical mechanics of stellar systems and an approach to equilibrium are described This book will be of interest to physicists
