political history of radio is reviewed by Michael X Delli Carpini while David Bartlett shows how one of radio's prime functions has been to serve the public in time of disaster. Other contributors discuss radio as a cultural expression, the global airwaves, and the economic, regulatory, social, and technological structures of radio. Collectively, the contributors provide an intriguing study into the rich history of radio and its impact on many areas of society. It provides a wealth of information for historians, sociologists, and communications and media scholars. Above all, it helps explain how media intersect, change, focus, but still manage to survive and grow in a commercial environment.

Christopher H. Sterling, 2004-03. Produced in association with the Museum of Broadcast Communications in Chicago, the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world, as well as specific programs and people, networks and organizations, regulation and policies, audience research, and radio's technology. This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old, with essays that provide essential information on the subject as well as comment on the significance of the particular person, organization, or topic being examined.

The Mathematical Radio Paul J. Nahin, 2025-09-16. How a modern radio works, told through mathematics, history, and selected puzzles. The modern radio is a wonder, and behind that magic is mathematics. In *The Mathematical Radio*, Paul Nahin explains how radios work, deploying mathematics and historical discussion, accompanied by a steady stream of intriguing puzzles for math buffs to ponder. Beginning with oscillators and circuits, then moving on to AM, FM, and single sideband radio, Nahin focuses on the elegant mathematics underlying radio technology, rather than the engineering. He explores and explains more than a century of key developments, placing them in historical and technological context. Nahin, a prolific author of books on math for the general reader, describes in fascinating detail the mathematical underpinnings of a technology we use daily. He explains and solves, for example, Maxwell's equations for the electromagnetic field. Readers need only a familiarity with advanced high school level math to follow Nahin's mathematical discussions. Writing with the nonengineer in mind, Nahin examines topics including impulses in time and frequency spectrum, shifting at the transmitter, the superheterodyne, the physics of single sideband radio, and FM sidebands. Chapters end with challenge problems, and an appendix offers solutions, partial answers, and hints. Readers will come away with a new appreciation for the beauty of even the most useful mathematics.

Ranging across both the commercial and public service broadcasting sectors, it recovers and explores the lived experiences of a wide cross-section of Australian listeners and viewers. Offering new perspectives on how audiences have responded to broadcast content and how radio and television stations have been part of the lives of Australians over the past one hundred years, this book invites us into the dynamic world created for children by the radio industry, traces the operations of radio and television clubs across Australia, and uncovers the workings of the Australian Broadcasting Commission's viewers' advisory committees. It also opens up the fan mail received by Australian broadcasting stations and personalities, delves into the complaints files of regulators, and teases out the role of participants and studio audiences in popular matchmaking programs. **Love On The Line** JC Savoy, 2025-03-26 One phone call, one charming voice, and a customer service mix-up that rewrites everything. When small-town bookstore owner Claire Delaney calls customer service to track down a missing book, the last thing she expects is to enjoy the conversation. But Will, the charming voice on the other end of the line, turns a frustrating mix-up into a playful exchange of literary debates and unexpected chemistry. What starts as a series of texts and book challenges takes a surprising turn when Will shows up in Whispering Falls for the weekend. As Claire gives him a tour of her town, their connection deepens, leaving them both wondering: could this be more than just a fleeting chapter? A heartwarming short romance about books, banter, and the magic of an unexpected connection. **Radio's Legacy in Popular Culture** Martin Cooper, 2022-01-27 Examining work by novelists, filmmakers, TV producers, and songwriters, this book uncovers the manner in which the radio and the act of listening has been written about for the past 100 years. Ever since the first public wireless broadcasts, people have been writing about the radio, often

negatively sometimes full of praise but always with an eye and an ear to explain and offer an opinion about what they think they have heard Novelists including Graham Greene Agatha Christie Evelyn Waugh and James Joyce wrote about characters listening to this new medium with mixtures of delight frustration and despair Clint Eastwood frightened moviegoers half to death in *Play Misty for Me* but Lou Reed's *Rock the Casbah* the act of listening as a cultural expression focusing on fiction films and songs about radio Martin Cooper a broadcaster and academic uses these movies TV shows songs novels and more to tell a story of listening to the radio as created by these contemporary writers filmmakers and musicians
