Validation Agnieszka Bialek,David Doxaran,Vittorio Ernesto Brando,Clemence Goyens,Kevin Ruddick,Ana Ines Dogliotti,2025-08-26 Strict quality control is essential to ensure that the satellite data products routinely used for environmental monitoring of water and land surfaces are fit for purpose A crucial step in this process is the validation of the water and land surface reflectances from which the final end user products are derived The topic of radiometric validation is growing rapidly in importance both because of the advent of operational satellite missions for routine environmental monitoring and because of the rapid expansion in the number of satellite missions including CubeSat constellations with limited cal val resources This enhanced need for radiometric validation data covering a wide VIS NIR SWIR range e g 380 2400nm preferably with a hyperspectral resolution must be met by new techniques and hardware particularly ground based automated radiometry **SeaWiFS Postlaunch Technical Report Series** ,1998 SeaWiFS Postlaunch Technical Report Series B. Research,1967 **Information Technologies for Remote Monitoring of the Environment** Vladimir Krapivin,Anatolij M. Shutko,2012-06-12 The key novelty of this book is first of all in the successful attempt to conduct jointly modeling of environment in terms of physical environment related parameters and measuring similar parameters by means of multispectral remote sensing primarily by means of passive microwave remote sensing technology Another new step is in the development and utilization of a multilevel approach which includes remote sensing of the land and water parameters like soil moisture depth to water table biomass of vegetation temperature and salinity of water in situ measurements of similar parameters and incorporation of GIS and data sets into the models of typical environments The part of book which contains remote sensing is focused on multipurpose observations from aircraft obtained in many soil climatic zones in different countries and is reach of the examples of practical application Applied mathematicians geophysics hydrologists socio economists statesmans and other researchers of environmental changes will find a wealth of information and ideas in this book
