Radiotherapeutic Management Of Prostate Adenocarcinoma:

Management of Prostate Cancer Michel Bolla, Hendrik van Poppel, 2012-04-24 This book provides an exhaustive review of the current state of the art in the management of prostate cancer from screening to treatment. A particular feature is the emphasis placed on the value of a multidisciplinary approach. The opening chapters address basic aspects including epidemiology, biology and chemoprevention. The role of individual and mass screening is carefully appraised and diagnosis, clinical work up and the role of active surveillance are discussed in detail. Subsequent chapters are devoted to each of the therapies that may be employed including open and robotic laparoscopic radical prostatectomy, the various forms of radiation therapy, high intensity focused ultrasound, cryotherapy, hormonal therapy and targeted therapies and vaccination. Up to date data from clinical trials are included. The editors are members of the EORTC who have coordinated phase III EORTC trials and have worldwide reputations. *Radiotherapy in Prostate Cancer* Hans Geinitz, Mack Roach III, Nicholas van

As, 2014-11-18 Today the arsenal of high precision or targeted radiotherapy includes a variety of techniques and approaches that like the pieces of a puzzle need to be put together to provide the prostate cancer patient with high level optimized radiation treatment. This book examines in detail the role of these innovative radiation techniques in the management of prostate cancer. In addition, a variety of current controversies regarding treatment are carefully explored including whether prophylactic treatment of the pelvic lymphatics is essential, the magnitude of the effect of dose escalation, whether a benefit accrues from hypofractionation and what evidence exists for the superiority of protons or heavy ions. *Radiotherapy in Prostate Cancer: Innovative Techniques and Current Controversies* is intended for both radiation oncologists and urologists with an interest in the up to date capabilities of modern radiation oncology for the treatment of prostate cancer.

Radiotherapeutic Management of Prostate Adenocarcinoma Anthony V. D'Amico, 1999-05-28 Adenocarcinoma of the prostate has become the most frequently diagnosed cancer in men over the age of 50. This timely book outlines prostate cancer staging and focuses on the latest treatments in radiotherapy including the development of new techniques which allow the radiation oncologist to target the tumour more precisely while simultaneously minimizing the radiation reaching normal juxtaposed tissues such as the rectum and urethra. Both technical and clinical aspects of external and internal radiation therapy for all stages of prostate cancer are considered. The text reviews 3D conformal radiotherapy and looks at the role of protons, neutrons, ultrasound and MRI guided prostate brachytherapy in the management of localised disease and the value of hormonal and other novel therapies in the treatment of locally advanced disease. Outcome prediction following treatment is also discussed. This comprehensive text, edited by acknowledged international experts, will be an invaluable addition to the bookshelves of any radiotherapy department. **Multidisciplinary Management of Prostate Cancer**

Vincenzo Gentile, Valeria Panebianco, Alessandro Sciarra, 2014-04-11 Prostate cancer is the most common neoplasm in men and its management is very complex in terms of both diagnosis and treatment. In recent years the value of multidisciplinary

management within a prostate cancer unit has been increasingly recognized. Such a multidisciplinary approach within a specialized unit involves a variety of specialists including urologists, oncologists, radiotherapists, radiologists, and pathologists. This book describes in detail the advantages of multidisciplinary management of prostate cancer. It opens by explaining the nature of the required multidisciplinary team and the potential benefits of the prostate cancer unit as a structure for the delivery of specialist multidisciplinary care. Epidemiological aspects favoring multidisciplinary management are described, and each element of care within the context of the prostate cancer unit is then discussed. Also, the role of advanced imaging, Multiparametric MRI in the management of PCa, Early diagnosis, risk classification, treatment decision making, surgery, radiotherapy, medical therapies, and health care support are all fully considered. This book will be informative and enlightening for all who are involved in the management of patients with prostate cancer.

Management of Advanced Prostate Cancer Choung Soo Kim, 2018-07-04. This textbook summarizes the state of the art in the management of locally advanced and metastatic prostate cancer with the aim of providing the knowledge required for optimal treatment decision making in individual cases. Readers will find comprehensive coverage of the latest developments in surgery, radiotherapy, androgen deprivation therapy, ADT, chemotherapy, and immunotherapy. The role of the hormonal therapies abiraterone and enzalutamide and docetaxel-based chemotherapy in castration-resistant prostate cancer and hormone-sensitive metastatic disease is carefully evaluated. Among the other therapies discussed are LHRH agonists and antagonists, cabazitaxel, radium 223, and various novel agents still under clinical trials. The section on surgical approaches addresses, among other topics, the use of robot-assisted radical prostatectomy, pelvic lymphadenectomy, and the benefits of adjuvant and neoadjuvant therapy. The current role of external beam radiotherapy alone or in combination with ADT and brachytherapy for locally advanced disease is reviewed. *Management of Advanced Prostate Cancer* will be a valuable resource for practitioners at all levels of expertise.

Prostate Cancer William Duncan, 2012-12-06 In February 1980 the Royal College of Radiologists London held its Second Symposium on Clinical Oncology The subject was Prostatic Cancer and this publication is based on the presentations at this meeting by leading authorities in the United Kingdom The principal objective of these Symposia is to promote multidisciplinary collaboration for the benefit of cancer patients Awareness and understanding of advances in a broad range of subjects are essential to ensure the timely and effective application of new techniques in the prevention and treatment of all forms of cancer Communication of this kind may also stimulate the creation of new ideas that may prove to be of more fundamental relevance to cancer research Prostatic cancer has been afforded too little attention in the past and its importance in Clinical Oncology has not been adequately recognised And yet over the last 10 years considerable progress has been recorded in our understanding of this disease and in its assessment and management These achievements are well documented in this collection of papers and the outstanding problems are also clearly indicated It is acknowledged that the early diagnosis of prostatic cancer presents a continuing challenge associated with the uncertainties that concern the clinical significance of latent cancer of the prostate The accurate assessment of the incidence and prevalence of the disease is

extremely difficult and together these problems complicate the evaluation of the management of early or localised prostatic cancer
