The RAF's Armourers Tony Lamsdale, Phil Appleby, 2023-11-23 It is said that one of the earliest trades in the world is that of the armorer Historically it is a profession dated slightly after prostitution but well before banking Since the birth of the Royal Flying Corps in 1912 through to the modern Royal Air Force the role of the armorer has been pivotal Not for nothing did the founder of the RAF Lord Trenchard once declare The armorer without him there is no need for an air force In the years since the need for RAF armorers was first recognized it has been a role that has evolved with the times What has remained constant however is the fact that it is still a fascinating and potentially dangerous trade with many different branches and specialisms In this book the authors one of whom Tony Lamsdale is himself a former RAF armorer reveal the previously untold story of how the trade has adapted to the most modern of military machines the aircraft The authors look at the shared history of the armorer and the RAF through the eyes of those who served These veterans stories span decades and their first hand accounts and insights into conflict and peace time operations demonstrate the qualities and characteristics that make armorers unique The book starts with a brief history of the armorer then before capturing the adventures and exploits of RAF armorers from the Second World War and on into the Cold War The dangerous duties of the armorers on deployment in such places as the Falklands Iran Iraq or Afghanistan are all explored There is also the question of having to learn of bomb dumps the use of small arms and the unique world of the armorer with its own peculiar language and the camaraderie of the crew room With each chapter brought to life through personal anecdotes and shared experiences this book provides an insight into an utterly essential role which has remained largely hidden until now *The Royal Air Force at Home* Ian Watson, 2010-06-19 Military public relations endeavors ultimately seek to build a sense of common interests and aims and so generally foster good relations with the people they defend and there in ensure a stable society The armed forces when engaging on any public relations exercise have traditionally sought to provide an entertaining spectacle For years this has been typified by parades bands mock battles drill displays and other relevant feats of military prowess which have captured the imagination of the public and inspired potential recruits The 20th Century brought a new dimension to the field of warfare and subsequently added a new strand to the fabric of public ceremony and displays by the armed forces That new dimension was the arrival of powered flight Display flying began within five years of the Wright Brothers making their milestone first flight The first events staged in Britain which centered on demonstrations by flying machines were organized by the town councils of Blackpool and Doncaster and were held within days of each other in October 1909 1920 was the year that the first of the famed and legendary Hendon Air Pageants was staged and this is where military air shows traditionally began The Hendon Displays were organized and staged by the still fledgling Royal Air Force and it was probably due in no small part to the prestige and spectacle of this fresh new dimension of military pageantry together with other like events held at RAF airfields through the next two decades that the very existence of the RAF was saved from the threat of abolition The

history of the RAF's commitment one that compares almost uniquely with other air forces toward display flying through the years after World War II has now come of age. This account of their record in this often overlooked but then again traditional field of military customs describes and illustrates the major public RAF events since 1920. RAF in Camera Keith Wilson, 2022-09-15. In July 2018 the nation looked skyward over Buckingham Palace in awe as the Royal Air Force celebrated its first 100 years with a spectacular parade and flypast over London. This event demonstrated a very different perspective of the RAF well away from its operational commitments. The expertise and precision of those RAF pilots flying in some of the most famous aircraft in the world has been displayed since the very first days of military aviation. The Inter War period was dominated by the Hendon Air Pageants where many aircraft made their public appearance. Post war it was the turn of the jet display teams with the Black Arrows and Firebirds laying the foundations for the aerial mastery that is today's Red Arrows. The various anniversaries have seen a growth in special artwork being applied to aircraft flown by squadrons celebrating key anniversaries. This is covered in considerable detail within this volume. On the ground the RAF is represented at major celebrations and key public events by the Queen's Colour Squadron which demonstrates its world famous continuity drill routine while providing a guard of honor for visiting Heads of States. They are frequently accompanied with the Service's own bands which have grown from those created by its squadrons over a century ago. From the Berlin Airlift in 1948 to flood relief in Kenya and the international relief effort in the Caribbean following Hurricane Irma in 2017 the RAF has been deployed overseas in response to numerous international crises. But aid operations have also been mounted at home. Under the banner of Military Aid to the Civil Powers helicopters and aircraft have airlifted food and supplies to areas cut off by severe weather. Sea King helicopters have rescued villagers stranded by flash flooding in Boscastle while Chinook helicopters have assisted with the rebuilding of flood defenses breached by severe floods across the country. The golden age of record breaking also features in this book. From long range flights to South Africa and Australia the Schneider Trophy triumph speed records in the jet age along with altitude records with pilots in special pressure suits the RAF has demonstrated its reputation as a truly pioneering Air Arm. Keith Wilson takes us on a journey through the Royal Air Force's public persona during their 100 year history. All landmark events are referenced in this thorough well researched and image packed publication. As with the three previous releases this new addition to the In Camera series is sure to be regarded as something of a collector's edition and a real enthusiast's favorite. appropriate to speak of an ongoing guilt management that includes not only Germany but Europe as a whole In a series of case studies which consider the work of Konrad Wolf Alexander Kluge Rainer Werner Fassbinder Herbert Achterbusch and Harun Farocki as well as films made in the new century Elsaesser tracks the different ways the Holocaust is present in German cinema from the 1950s onwards even when it is absent or referenced in oblique and hyperbolic ways Its most emphatically absent presence might turn out to be the compulsive afterlife of the Red Army Faction whose acts of terror in the 1970s were a response to as well as a reminder of Nazism s hold on the national imaginary Since the end of the Cold War and 9 11 the terms of the debate around terror and trauma have shifted also in Germany where generational memory now distributes the roles of historical agency and accountability differently Against the background of universalized victimhood a cinema of commemoration has if anything confirmed the violence that the past continues to exert on the present in the form of missed encounters retroactive incidents unintended slippages and uncanny parallels which Elsaesser reviving the full meaning of Freud s Fehlleistung calls the parapractic performativity of cultural memory

How Strategic Airpower has Changed the World Order Nigel David MacCartan-Ward,Anthony Wells,2024-06-30 This work demonstrates how maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land In this book the history and utility of land and carrier based strategic airpower is brought to life by the gallant exploits and photographs of B 17 aircraft Quittin Time and of its Navigator Fred Julian in the Second World War and by the unforgiving and unswerving dedication of Sharkey Ward and his Sea Harrier team in the Falklands war The overarching message is that the strategic airpower lessons of the past eight decades underpin the urgent need for the UK government to invest more wisely in its Fleet so that the latter may work effectively in conjunction with the US Navy on the global mission to deter those that would harm us and to maintain the freedom of passage of all shipping throughout the global commons The authors show how a maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land
