Planting for Pollinators Heather Angel, 2023-06-22 Planting for Pollinators is an easy to use gardening guide to help you encourage different types of insect pollinators into your garden. Insect pollinators not only bring joy to our gardens they also provide an essential service for our planet. Without bees, flies, hoverflies, butterflies, moths and beetles, some of our favourite foods, flowers and plants would cease to exist. Whether you have a large garden, an urban balcony or just a window box, planting to encourage pollinators is a fantastic and surprisingly easy first step in creating a wildlife friendly space. Planting for Pollinators features a wide range of plants with guidance on the best ways to nurture lawns and verges, pollinator predation and tips on watching and photographing wildlife. Beautifully illustrated throughout with images from award winning wildlife photographer Heather Angel, this essential guide will show you how plants communicate with insects and why it is so important to protect our pollinators. Organised by season and featuring more than 100 plant species including bulbs, annuals, perennials, shrubs and climbers, this practical guide will help you to discover the short and long term benefits of having a variety of pollinators visit your garden. **Wild Flowers** Anne Pratt, 1853 *Flowers, Shown to the Children* C.
