Otte,Keith Neilson,2012-09-10 This new study brings together leading experts to show how the modern world began with the coming of the railway They clearly explain why it had a greater impact than any other technical or industrial innovation before and completely redefined the limits of the civilized world While the effect of railways on economic development is self evident little attention has been paid to their impact on international relations This is unfortunate for in the period from 1848 to 1945 railways were an important element in the struggle between the Great Powers This took many forms Often as in East Asia the competition for railway concessions reflected the clash of rival imperial interests The success or failure of this competition could determine which of the European Powers was to dominate and exploit the markets of China and Siam Just as often railways were linked with military matters Prussia s success in the wars of German unification depended on its strategic railways just as much as on the strength of its armies and the rail links remained a vital aspect of German military thinking before the First World War So too did they for the Russians whose vast Empire required rail links capable of moving the Tsarist army quickly and competently Just as importantly railways could be vital for Imperial defence as the British discovered on the North West frontier of India This book will be of much interest to students of international history military history and strategic studies *Russia and Its Northeast Asian Neighbors* Kimitaka Matsuzato,2016-12-07 As a result of the Aigun 1858 and Beijing Treaties 1860 Russia had become a participant in international relations of Northeast Asia but historiography has underestimated the presence of Russia and the USSR in this region This collection elucidates how Russia s expansion affected early Meiji Japan s policy towards Korea and the late Qing Empire s Manchurian reform Russia participated in the mega imperial system of transportation and customs control in Northern China and created a transnational community around the Chinese Eastern Railway and Harbin City The collection vividly describes daily life of the emigre Russians community in Harbin after 1917 The collection investigates mutual images between the Russians and
