Pamela Sambrook, 2021-05-27 In this remarkable study Pamela Sambrook rescues from obscurity the contribution of a former member of Napoleon's Imperial Guard to the development of specialist hotels and catering in the formative years of the railway network in England and France In doing so she interrogates what lies behind some of Zenon Vantini's very real achievements legacies and disasters She asks how far he was driven by his familial background in Elba and his involvement in the political turmoil of early nineteenth century France and to what extent his whole life was known to those around him Vantini's extraordinary life encapsulates the change between two very different worlds the old imperial past and the new age of entrepreneurial risk taking Never shaking off his old political loyalties he believed resolutely that the mobility afforded by railway travel would change Europe fundamentally In the long view he was a component part in the very early years of an industry which revolutionised England and Europe more than did even his hero Napoleon
