Bean, 1975 During the 1972 IFYGL alert periods the highly instrumented NOAA RFF DC 6 aircraft was used to record the time series of wind temperature and water vapor at heights ranging from 18 to 300 m above the surface of Lake Ontario The aircraft was equipped with a gust probe system a fast response thermistor a microwave refractometer for water vapor measurements and a downward pointing IR system as well as the normal in flight measurement of standard meteorological parameters The time series records have been found to display a highly intermittent nature This is especially the case for evaporation when in the fall Polar Continental outbreaks move across the lake In particular such an outbreak of cold dry air moved across the lake at 12 15 m s⁻¹ on 9 October 1972 This resulted in the air temperature at 30 m above the lake to drop from 12 to 6 C while the evaporation rate increased to more than 1 cm day⁻¹ This may be compared with the 0.5 cm day⁻¹ normal evaporation observed in the tropics during BOMEX Furthermore IR lake surface temperatures show cold regions 5 C along the north shore presumably due to strong upwelling while the center and south shore regions of the lake were of the order of 12 to 15C The turbulent flux quantities of

momentum heat and water vapor were obtained by the eddy correlation technique and their spectra were determined at several locations over the lake surface for 3 minute sampling lengths At the aircraft speed of 92 m s⁻¹ this represents a flight path of 17 km for both along wind and constant fetch patterns The spectra demonstrate the tendency for the peak value to march to higher wavelengths with increasing height

On Quantitative Precipitation Forecasting, 1960 *Measuring Precipitation from Space* V. Levizzani, P. Bauer, F. Joseph Turk, 2007-05-11 No other book can offer such a powerful tool to understand the basics of remote sensing for precipitation to make use of existing products and to have a glimpse of the near future missions and instruments This book features state of the art rainfall estimation algorithms validation strategies and precipitation modeling More than 20 years after the last book on the subject the worldwide precipitation community has produced a comprehensive overview of its activities achievements ongoing research and future plans

Monthly Weather Review, 1984 **Blurring organizational issues and social phenomena in the age of technology: a multidisciplinary perspective** Nemesio Castillo, Alberto Ochoa, Chloé Malépart, 2013-04-29 The predominant view in economic theory until the crisis of the 70s argued the great enterprise was the key player in the innovation process this was conceived as an activity that unfolded in specific areas with clear responsibilities and predetermined objectives This operating structure of the innovative process was functional demand model that favored the standardization of production The innovative process was developed predominantly by firms that had a domain oligopolistic market from which they made windfall with which financed the research and development activities In this context the role of SMEs in the innovation process is limited to covering the portion of the market that big companies left

Florida Cumulus Seeding Experiment for Drought Mitigation W. L. Woodley, 1971 **Advances in SAR Remote Sensing of Oceans** Xiaofeng Li, Huadong Guo, Kun-Shan Chen, Xiaofeng Yang, 2018-10-12 The oceans cover approximately 71% of Earth's surface 90% of the biosphere and contains 97% of Earth's water Since the first launch of SEASAT satellite in 1978 an increasing number of SAR satellites have or will become available such as the European Space Agency's ERS 1 2 ENVISAT and Sentinel 1 series the Canadian RADARSAT 1 2 and the upcoming RADARSAT Constellation Mission series satellites the Italian COSMO SkyMed satellites the German TERRASAR X and TANDEM X and the Chinese GAOFEN 3 SAR among others Recently European Space Agency has launched a new generation of SAR satellites Sentinel 1A in 2014 and Sentinel 1B in 2016 These SAR satellites provide researchers with free and open SAR images necessary to carry out their research on the global oceans The scope of *Advances in SAR Remote Sensing of Oceans* is to demonstrate the types of information that can be obtained from SAR images of the oceans and the cutting edge methods needed for analysing SAR images Written by leading experts in the field and divided into four sections the book presents the basic principles of radar backscattering from the ocean surface introduces the recent progresses in SAR remote sensing of dynamic coastal environment and management discusses the state of the art methods to monitor parameters or phenomena related to the dynamic ocean environment and deals specifically with new

techniques and findings of marine atmospheric boundary layer observations *Advances in SAR Remote Sensing of Oceans* is a very comprehensive and up to date reference intended for use by graduate students researchers practitioners and R D engineers working in the vibrant field of oceans interested to understand how SAR remote sensing can support oceanography research and applications *Doppler Radar and Weather Observations* R. J. Doviak, Dušan S. Zrnić, 2006-01-01 This book reviews the principles of Doppler radar and emphasizes the quantitative measurement of meteorological parameters It illustrates the relation of Doppler radar data and images to atmospheric phenomena such as tornadoes microbursts waves turbulence density currents hurricanes and lightning Geared toward upper level undergraduates and graduate students this text was written by two scientists at the National Severe Storms Laboratory in Norman Oklahoma a division of the National Oceanic and Atmospheric Administration Topics include electromagnetic waves and propagation weather signals and their Doppler spectra weather signal processing measurements of precipitation and turbulence and observations of winds and storms as well as fair weather Radar images and photographs of weather phenomena highlight the text *Climate Change in the Mediterranean and Middle Eastern Region* Walter Leal Filho, Evangelos Manolas, 2022-01-01 This book serves the purpose of showcasing some of the works in respect of applied research field projects and best practice to foster climate change adaptation across the region Climate change is having a much greater impact in the Mediterranean than the global average In the Paris Climate Agreement the UN member states pledged to stop global warming at well below two degrees if possible at 1.5 degrees This mark which is expected elsewhere only for 2030 to 2050 has already been reached in the region The situation could worsen in the coming years if the global community does not limit its emissions The above state of affairs illustrates the need for a better and more holistic understanding of how climate change affects countries in the Mediterranean region on the one hand but also on the many problems it faces on the other which prevent adaptation efforts There is also a perceived need to showcase successful examples of how to duly address and manage the many social economic and political problems posed by climate change in the region in order to replicate and even upscale the successful approaches used It is against this background that the book *Climate Change in the Mediterranean and Middle Eastern Region* has been produced It contains papers prepared by scholars practitioners and members of governmental agencies undertaking research and or executing climate change projects and working across the region *Advances in Oil Crops Research - Classical and New Approaches to Achieve Sustainable Productivity* Dragana Miladinović, Johann Vollmann, Leire Molinero-Ruiz, Mariela Torres, 2019-11-20 **Encyclopedia of Environmental Management, Four Volume Set** Sven Erik Jorgensen, 2012-12-13 Winner of an Outstanding Academic Title Award from CHOICE Magazine *Encyclopedia of Environmental Management* gives a comprehensive overview of environmental problems their sources their assessment and their solutions Through in depth entries and a topical table of contents readers will quickly find answers to questions about specific pollution and management issues Edited by the esteemed Sven Erik Jorgensen and an advisory board of renowned
