Molecular Diagnosis of Salmonid Diseases Carey O. Cunningham, 2013-03-14 Reviews Methods and Technology in Fish Biology and Fisheries published by Kluwer Academic Publishers is a book series dedicated to the publication of information on advanced forward looking methodologies technologies or perspectives in fish and fisheries This series is especially dedicated to relevant topics addressing global international concern in fish and fisheries Humans continue to challenge our environments with new technologies and technological applications The dynamic creativity of our own species often tends to place the greatest burden on our supporting ecosystems This is especially true for aquatic networks of creeks lakes rivers and ocean environments We also frequently use our conceptual powers to balance conflicting requirements and demands on nature and continue to develop new approaches and tools to provide sustainable resources as well as conserve what we hold most dear on local and global scales This book series will provide a window into the developing dynamic among humans aquatic ecosystems both freshwater and marine and the organisms that inhabit aquatic environments There are many reasons to doubt the increasing social and economic value technology has gained over the last two centuries Science and technology represent stages in human development I agree with Ernst Mayer when he said in *Toward a New Philosophy of Biology* 1988 that endeavors to solve all scientific problems by pure logic and refined measurements are unproductive if not totally irrelevant

Aquatic Toxicology and Risk Assessment Wayne G. Landis, 1990 The latest volume in the series on aquatic toxicology reflects the increasing emphasis on the development of new techniques to examine the molecular and cellular effects of toxicants The 25 papers provide information on sediment toxicity and bioavailability comparative toxicity and mechanisms sub
